RAILWAY SHIFT TO CIVIL POWER LOOMS IN CHINA

Militarists Losing Grip on Nation's Utilities-Some Surrender Cars

CHANGE ESSENTIAL TO BRING REVENUE

Practical Ruin of Lines Is Reported-Warlords Have Made No Repairs

SPECIAL TO THE CHRISTIAN SCIENCE MONITOR PEIPING, China - Considerable progress appears to have been made in the campaign to persuade the Nationalist warlords to turn back the Government railways to civil control. Some of the more influential militarists, headed by Gen. Chiang Kai-shek, have surrendered the cars held by their troops and have agreed not to interfere with the railway bureau's conduct of the lines.

That this is the first requisite toward any scheme to restore Chinese railways to any sort of efficient operation is a fact which is now being emphasized by the railway officials. In the past, officials have not dared to criticize the warlords, but the Kuomintang has succeeded in establishing a system which permits public opinion to be expressed.

That Chinese railways, efficiently operated, would be a source of revenue to the Government second to none in the country, is the opinion of foreign experts. The maritime customs yielded only 82,000,000 taels during 1928, and although China possesses only 7000 miles of railway, a profit equal to the customs revenues would be possible under such conditions as prevail in the West, those observers declare. Chinese railways, they declare, have yielded a profit greater than anywhere else in the world so long as they were permitted to function as western lines always

Take All Revenues

But since 1924 most of the rail-ways have been under continuous domination of militarists. That is still true, although the Nationalist Government has made a beginning toward correcting these conditions. The warlords not only take all the revenues which the railways use, appropriating money which should be et aside for repairs and for repayment of bonds, but they interfere

Which run through their territory, as they have done for five years. Yen Hsi-shan and Feng Yu-nsiang, for Alpins," had organized such helpful

New Coalition of Estonians

From 10 Members to 7 and State Head

SPECIAL FROM MONITOR BUREAU

istry and a new President, called in Estonia, the State Head. For the first time in the little republic's 10 years' history, the occupant of this position

In addition to the 24 Socialists and the 5 Lutheran members, the new coalition includes the (bourgeois) Settlers and Leaseholders Party (14) and the so-called Labor Party (13). This gives a total of only 56 votes in a house of 100, so that the defection of the smallest of the four groups would render the Government's posi-tion practically impossible.

The new Ministry, unlike its pre-decessors, consists of the State Head and only seven members. Hitherto 10 has been the usual number, but in view of the expense involved and the fact that this gave a proportion of one minister for every 10 members of Parliament, some diminution has long been felt to be necessary. In the new Cabinet, therefore, the depart-ments of Justice and Interior have been put under one minister. So have those of Finance and Commerce and of Education and Public Welfare.

The new Cabinet consists of the following: State Head-August Rei Foreign Affairs—Jan Lattik (Christian People's Party). Interior and Justice—Thomas Kalbus (Labor). War—M. Jukham (Labor). Finance and Commerce-A. Oinas (Socialist). Education and Public Works—L. Johanson (Socialist). Ways and Communications—O. Köster (Settlers' Party). Agriculture—K. Soonberg (Settlers' Party).

EUROPE FACES FUEL SHORTAGE IN RAIL TIE-UP

Cold Wave Sweeps Over Continent-Distress Great in Southeastern States

LONDON (A)-The unusually severe cold wave, continuing over Europe, is causing considerable distress, particularly in the southeast, where fuel shortage has been rendered acute through stoppage of transportation from Polish and Czechslovakian mines. Some 300 casualties have been reported from central Europe.
Rivers and sea channels over most

of Europe, save in Spain, were re-ported frozen over or choked with ice. Rome had a heavy snowfall. The Riviera was covered with snow. In Berlin schools were closed for a week because of the icy conditions. Temperatures in many cases are stated to be without precedent, al-though Scandinavia was normal.

The purpose of the school would be to train lecturers, whose mission Government had announced distribution of free coal at 8 a. m., refusing to wait till morning. Fifty persons were injured as a result of the ensuing riot.

In Vienna the Chancellor, Dr young people of all nationalities who wished to spend a pleasant holiday and meet under specially favorable would save five tons of coal daily. conditions representatives of widely different nationalities, denominations and Warsaw made personal appeals and races.

Captain Bach has obtained the Poland for additional fuel, pointing promise of co-operation from the out that Austria's supply had shrunk Secrétariat of the League of Nations, from 125,000 tons to 20,000 tons.

as well as from several international But in Czechoslovakia miles of organizations now active at Geneva coal-laden freight cars were frozen or in the neighborhood, in the pro-ject. fast to tracks and could not be moved, while in Poland rationing of It is hoped that American youths coal supplies had been will find it possible to take advanavert a shortage there. At Lwow, Poland, not a single train had arrived there days and a generous efforts of the "Knights of or left for the last three days and a food shortage as well as fuel short-

Carefully planning in advance every detail of the journey to Panama just as he has done so many times in the days when he flew the mail and prepared for his successful fight across the Atlantic from New York to Paris, Colonel Lindbergh completed the voyage without untoward incident. He arrived at Cristobal, Panama, on Feb. 6 and did not start back until Feb. 18.

Col. John Hambleton, vice president of Pan-American Airways, and Harry Lee Buskey, radio operator, who accompanied Colonel Lindbergh on the trip, climbed out of the amphibian as Colonel Lindbergh unloaded the 12 sacks of mail he brought and delivered them to Postmaster O. W. Pittman.

"There is not now a great deal to be done before daily service can be inaugurated from Miami to Pan-America," he said. "Better facilities for communication are being in-stalled and other facilities to air flying are being put into condition to augment the service. "The Pan-American Airways, Inc.,

MISSING FLIERS FOUND IN DISABLED AMPHIBIAN

MIAMI, Fla. (P) - Pan-American Airways, Inc., announced Feb. 13 that R. I. Dunten and Lieut. Steven Callaway had been rescued by an utomobile ferry 60 miles northeast of Key West from the amphibian plane in which they were forced

down Tuesday.

Neither had been harmed, although they had drifted all night in the disabled craft. Word of the rescue came after Col. Charles A. Lindbergh had hopped off to join the search for the plane, and after naval seaplanes at Pensacola and coast guard boats had begun preparations to look for the amphibian.

Consider Now the Added Convenience

New evening rates for out-of-town telephone calls by number do more than save you money. They add convenience and efficiency to your service.

Formerly, day rates applied until 8:30 P. M. Evening rates now begin at 7:00 P. M. and continue until 8:30 P. M.

This hour-and-a-half in the early evening means much at both ends of your telephone line. It's a leisure hour.

In most households the evening meal is over, the evening's engagements still ahead. It's a convenient time to make social telephone calls. And you're likely to find the people you call at home.

> Evening rates are substantially lower than day rates; but there are two things to remember. They apply only to station-to-station calls, best made by number. And they do not apply at short distances where the day rate is 35 cents

Even at full day rates we have always had a considerable volume of out-of-town calls during the early evening. We are prepared to handle efficiently the increased business sure to come as the economy and convenience of this new evening service become better known.

POPE UNLIKELY TO JOIN LEAGUE, VIEW IN GENEVA

can Right to Ask Admission. It Is Declared

By HUGH F. SPENDER BY WIRELESS TO THE CHRISTIAN SCIENCE MONITO entitled to do this under any self-governing state may become course which he himself re a member, provided it is elected by to Roman Catholics all

The clause in agreement with Italy, however, by which the Pope pledges himself "to take no part in international congresses called to settle political or territorial differences, unless requested by both parties," is subject to more than one which were taken at the signing of interpretation. Formerly the Pope, the Italo-Vatican treaty and at the as Ambassador although virtually independent, was anniversary ceremony at St. Peters, not, under the law of guarantees, a were written by Signor Mussolini temporal sovereign, in the sense of himself, it is stated. The reels were owning his own domain, since he submitted to the Premier after they held it by the good will of the Italian were developed, and he then person-Government. Moreover, although ally undertook the task of writing Italy had conceded to him the right the captions. They are now being to use freely the apostolic palaces, he submitted to the Pope. always refused to acknowledge the law by which they were granted to him. Juridicially his position was without precedent and altogether anomalous. This was indeed the burden of the papal complaint against which, in the circumstances, objected to the Pope asking for a seat in the Assembly of the League. Pact to Be Registered

But it is one thing for the Pope to acquire the right to ask admission to After that, the first of the conversathe League and quite another for him tions ensued.

ment with the Vatican to render it binding. No doubt she will do so. Opinion in Roman Catholic circles at Geneva, however, from the first has maintained the unlikelihood of the Pope asking admission, after the But British Officer Thinks Seaobservance of the formality of regis-For. according to this opinion, the Supreme Pontiff must be well aware that such a request would raise acute religious troversy. Protestant churches, it was predicted, would at once be up in rms at the idea of a rival ecclesiastical authority obtaining an advan-Moreover, the Cardinal Secretary of in Europe, cannot have failed to Missionary Society's laymen's lunchnotice that the French press regards eon here.

"The American claim for parity in the Italo-Vatican agreement with conspicuous lack of enthusiasm, and that none of the so-called Roman Catholic powers has expressed any approval of the idea of the Pope's joining the League.

Unanimous Election Unlikely French opinion is obviously apprehensive lest the Papacy in its new any question of interfering with form may be drawn into the ambit American sea-borne commerce in any Now, all states which have been admitted to the League since its foun-ain, he said, should exercise all her dation have been elected unanimously. The Pope, however, would draw from the Rhineland. Lord Special to The Christian Science Monitor have to run the gantlet of a hotly Henry served in South Africa and the contested election. Undoubtedly he Dardanelles. ould be supported by Italy, but that might render his position more invidious. He might secure election, but his position would thereafter be one of extraordinary difficulty and delicacy, for every move his repre-sentative made on the political chessboard at Geneva would be closely scrutinized. The whole hischessboard at Geneva would be closely scrutinized. The whole history of the Papacy is a warning against its interference in political questions.

As a member of a great interna-tional organization for the adjust-ment of national policies, the Pope would be in danger of losing pres-tige as an ecclesiastical power. Early reports that the League secretariat was preoccupying itself with the question of the Pope's probable de-mand for admission to the League showed profound ignorance of the duties of the secretariat. Since the duties of the secretariat. Since the agreement between the Vatican and Italy was admitted to be binding, the duty of the secretariat would be limited, if the Pope asked for admission, to informing the members

Note size of Washing (1 Tub Full, 25 Miscellaneous Pieces, Large Ones in Proportion) Done in 15 Minutes condition and one trial was enough to prove to me it is all that you claim for it. I am more than pleased with it. — Mrs. C. R. S., Jetmore, Kanasa.

"I am well pleased with the work done by this washer so far." — Mrs. J. F. S., Cleburne, Tex.

"Mother enjoys using the little washer very much. It is so much easier to handle than a large nachine." — Miss. J. P., Clevelund, Ohio.
"I am were much pleased with the "The washer sent me on trial arrived last Monday. If anything it washes a little cleaner than the larger size washer does. It is so simple to operate that it makes washing seem like play and takes wash day right off the calendar." — G. B. T., Emporium, Pennsylvania.

Asn't it A MOST Amazing Washing Machine

THINK of it, Jack. It has beautifully washed this big batch of clothing in 15 minutes right here on the kitchen table. And see how the top when inverted nests inside the tub-it will fit on the pantry shelf-I tried it myself."

"But, Ann, didn't it slop suds and make a mess in the kitchen?"

"Not a bit, Jack, isn't it amazing!

"When it arrived less than an hour ago and I lifted it out of the big box, I couldn't wait until you got home. I just had to try it out, for that is what the manufacturers told us to do. You will recall they wrote, saying 'Use it as your own for 10 days.' So I rushed upstairs, gathered up these clothes from the soiled clothes basket, tossed them into the EDEN-ETTE tub, added hot water and soap flakes as the instruction card directed, and placed the top over

"Why, Jack, my hands fairly itched to plug in the extension cord. When I did there was a business-like purr as the motor started and the vacuum-cup commenced dipping. I just sat down and laughed for pure joy. In 15 minutes that washing was done—my delicate lingerie and grimy bath towels came out spotless. Here I have been longing for a big washing machine and knew nothing about this perfectly wonderful washer that sells for so little.

"Now I can understand how the manufacturers have such faith in the EDENETTE that they will send it out express paid to anyone who is interested and let them use it for 10 days absolutely free."

Send No Money

Don't send a penny—we will ship you the EDENETTE at once for 10 Days' Free Trial transportation charges paid. Use it as your very own, then you decide if you wish to keep it. If not, ship it back express collect. You are dealing with one of the oldest clothes washer manufacturers in this country.

Right to Send Pictures Into Homes Sought—Process Is Trade Secret

vision appeared before the Federal Radio Commission to discuss the possibility of transmitting motion and still pictures into the home. Practically every company experimenting in television sent representatives. The meeting was the outgrowth of the commission's order suspending television transmission in the radio cast band except in early morning hours. The hearing was designed to give representatives opportunity of discussing whether channels within the radiocasting band should be assigned to television, or whether it should be restricted to the high

frequency, shortwave channels. Experts of the Jenkins Television Company took issue with those from the Radio Corporation of America on the fundamental issues, the forme declaring that new development were about to be announced which would make it advisable to give television channels in the ordinary radiocasting bands. Following dis-cussion by John V. L. Hogan, consulting engineer for the commis-sion, and Dr. Lee DeForest, introdued as "dean of the televisionists,' C. Francis Jenkins, head of the Jenkins company, told of present activi-ties of his company. A new type 'visor" or television receiving device to cost about the same as a loudspeaker, would soon be on the mar-ket, he said. C. E. Huffman, chief engineer in the Jenkins company, said there were between 15,000 and 20,000 "lookers-in" at present, and gave further details of the Jenkins

The new visor could be attached to the ordinary radio receiver, he said. The picture transmitted would be equivalent to a newspaper "screen," having 48 lines to the inch, he said. and could be transmitted in a 10 kilocycle band. This would be enlarged by a lens to a six by six inch picture in the home. No attempt to send "movies" is immediately in prospect, he said. The aim is to transmit black and white animated

Julius Wineberger, representing the Radio Corporation of America, asked how such projection would be synchronized, and Mr. Huffman replied that the process was a trade secret. The two technicians took sharp issue with each other as to the practicality of the proposed device. Mr. Wineberger affirmed that a popular program could not be transmitted on a 10 kilocycle band; that it would cause objectionable interference if put in the radiocast band and that it should be put in with the should be put in with the short waves. The Radio Corporation of America has experimented with

Princes of India **Express Loyalty** to British Crown

Rulers of 40 States Deplore Demand for Dominion of Independent Status

NEW DELHI, India (AP)-Ruling inces of 40 Indian states on Feb. 13 expressed unswerving loyalty to the British Crown and deprecated the attitude of native leaders of British India who have been advocating a dominion status for the country with complete independence in the backround. The princes passed a resolution setting forth that any negotiations between themselves and British Indians must proceed on a basis of

loyalty to Great Britain. Lord Irwin, Viceroy of India, presided over the conference, which constituted the Chamber of Princes. The resolution was moved by the Maha-rajah of Patiala, and seconded by the

The mover of the resolution said in offering it that any permanent adjustment of the Indian situation must take into account the interests of the Indian states, British India and Great Britain. The Maharajah of Kashmir said he looked forward to a form of federation, rather than independence with accompanying isolation, as the ideal for the Indian states, but under the aegis of the British crown

MUSSOLINI WINS SUPPORT ROME (AP)—Four more organiza-ons have nominated Benito Mussolini, Premier of Italy, as their candidate in the forthcoming parliamentary elections. They are the National Syndicate of Improvements and Irrigation and the Federations of State Employees, Railwaymen and Postal Telegraph Workers.

BRITISH GUIANA COLONIZATION TESTS TO START

New Governor Hopes to Increase Population and Improve Finances

SPECIAL TO THE CHRISTIAN SCIENCE MONIT TRINIDAD, W. I .- If the coloniza tion scheme proposed for British Guiana by Sir F. Gordon Guggisberg, the new Governor, is successful, the creased its population from 306,000, well as the migrants on the 583-acre the present figure, to 2,000,000.

The Governor proposes immediately to start experimental land set-tlements in order to demonstrate to with a 12-inch blanket of snow. One prospective settlers the benefits of of the residence in the country.

If these turn out as anticipated, by the end of 1931, an immigration organization will be set up and, with the assistance of a subsidized steamer service, efforts will be made to attract people from some oversection of the Empire, crows.

Another way these birds have exobably India.

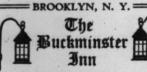

British Guiana, whose Constitution has recently been altered by an im-perial order-in-council giving the Government power to carry out a continuous policy, is a bankrupt country. Since 1921 there has been a deficit in public finances of over \$500,000 every year.

It is, however, a country of im mense potentialities, and it is be-lieved that Sir Gordon Guggisberg who has had an extraordinarily successful career as an administrator on the Gold Coast, will succeed in putting things right.

Fortunately there exists a separate fund of some \$608,000 which he will be able to use for the mitial stages of the colonization scheme without the necessity of increasing

Already an act has been passed by the Legislature authorizing the flotation of a loan of \$15,500,000, which includes \$250,000 for a survey of the whole colony and \$525,000 for the establishment of an agricultural

Two districts are to be surveyed at once, one in the northwest and the other in what is known as the Alluvial Belt, where the principal crops will be rice and sugar cane.

The Trumbull Portrait of George Washington, Painted Especially for the City of Charleston, S. C. This Painting Depicts Washington as Commander-in-Chief of the Continental Army and as He Looked When He Visited

Washington Portrait in South Carolina Deemed Fine Likeness

Among Charleston's Treasured Possessions Is Trumbull Painting, Originally Secured to Remind Posterity of Debt Owed to Continental Commander

SPECIAL TO THE CHRISTIAN SCIENCE MONITOR the most lasting testimony of their charleston, S. C. attachment to his person, to commemorate his arrival in the metrop-

memoration of a visit he made to this city 138 years ago, a life-size portrait of Gen. George
Washington stands in a place of
honor among the historic relics displayed in the quaint old city hali
here, and seems to survey the passing scene with calm and kindly gaze.
The portrait, which was painted by honor among the historic relics dis-played in the quaint old city hali here, and seems to survey the pass-ing scene with calm and kindly gaze. The portrait, which was painted by Col. John Trumbull by order of the Charleston City Council following Washington's visit in May, 1791, is judged by many authorities to be among the most authentic likenesses

among the most authentic likenesses of the Commander-in-Chief of the Continental Army to be found. It has been recommended that a fire-proof annex be added to the city hall to house the painting under favorable conditions, and that the annex be called the "Washington Portrait Chapel."

Washington posed for the picture in Trumbull's studio in Philadelphia. It was one of two life-size paintings the artist undertook for the city of Charleston. The first, representing Charleston. The first, represen Washington on the evening before the battle of Princeton, was re-jected because the city fathers desired a portrait of Washington as he was at the age when he visited Charleston.

In the words of the resolution they desired a painting of Washing-ton to be "placed in the city hall, as

Revolutionary men, for his series of battle pictures, then in progress. In addition to his skill as an artist, he had been in the family of George Washington as an aide, and was, therefore, well acquainted with all his features and person. The picture was painted from life, and represents Washington in his military garb, as commander-in-chief, and as such is an invaluable portrait. RECLAMATION'S Enrichment of Southwest's

an invaluable portrait.

"It gives me pleasure to record, as being now, perhaps, its only repository, certain contemporary testimony of the resemblance it bore to its distinguished subject.

its distinguished subject.

"A gentleman from Charleston, who was in Philadelphia while the portrait was in progress, told me that Colonel Trumbull, anxious for its success, requested him to call often and see it, which he did, and he assured me that the likeness was excellent; and this was afterward confirmed to me by one who was then our Representative in Congress, and who, as well as the other gentleman, who, as well as the other gentleman, had frequent opportunities of seeing General Washington.

"A venerable lady, a relict of a Revolutionary officer, told me that she also would fully testify, from her own individual knowledge, all that these gentlemen had said of the likewer."

likeness."
The sculptor, F. U. Ruckstuhl, who designed the statue of General Hampton that stands on the State House grounds at Columbia, in speaking of the Washington painting, said in a letter to a local newspaper some

"Your portrait of Washington is one of the finest that I have seen. I consider it finer than the one we have in New York. It is the best in composition, and is as fine and virile a likeness as the best of the Stuart pictures. It is so fine as to be worthy of a special pilgrimage to Charles-

SALMON CANNERS ASK INCREASE IN TARIFF

WASHINGTON-Pacific coast and Alaska salmon canners are planning to ask Congress for an increase in tariff duties on imported salmon, because of the threat of invasion by Japanese products from Siberia, according to the deputy commissioner of the Bureau of Fisheries, Louis H. Radcliffe. The present duty on imported canned salmon is 25 per cent. Canners will ask that this be inreased to 40 per cent ad valorem

Commissioner Radcliffe said he had received reports that Japanese firms recently had offered canned salmon of the cheaper grade on the Seattle markets for less than American can-ners could produce the product, despite the fact that the prices quoted by Japanese firms included duty paid and sea freight charges from Siberia.

Finished or unfinished to suit Craftsman Furniture Co.

This is the assertion made by Dr. Elwood Mead, commissioner of reclamation, who shows that more than 600,000 people live on the federal reclamation projects that dot the zone of scanty and uncertain rainfall once separating the humid East from the cities and farms of the Pacific coast. There are 685 schools and 683 churches. Crops grown in 1928 were worth \$135,000,000, almost enough to pay off the entire indebtedness of the Government. Cheap local food supplied by these projects has helped to open mining districts and keep mines in operation. The policy has cheapened freight rates by giving an immense amount of local business to transcontinental roads. "These reclaimed areas," said Dr. Mead, "are supplying this country with numerous valuable products which cannot be grown elsewhere. with numerous valuable products which cannot be grown elsewhere and they supply our markets with fresh vegetables at seasons of the year when climate suspends produc-tion in other sections. Dates can only be grown in the arid irrigated Southwest. Sugar beets, rice and

we have to send abroad. "Federal irrigated areas furnish an immense and stable market for the products of eastern factories. Automobiles, farm machinery, cloth-ing and other articles, manufactured in the East, fill the warehouses of western towns. Providing these com modities gives employment to thou-sands of workers and creates larger local demands for the products of eastern farms. Because so many of

RUMANIA TAKES STEPS FOR ROAD IMPROVEMENT

Director-General of Roads Asks for More Money in Budget

PROTAL TO THE CHRISTIAN SCIENCE MONTE BUCHAREST-One of the reforms which the new Rumanian Government is planning to bring about is the repairing of the roads and bridges, and a recent report made by the new Director-General of Roads shows that there is great need of improvement along this line.

He says that of the 87,500 kilo-

meters of roads in the country (eight kilometers make five miles) only 16,-

500 kilometers are in good condition. They are the state roads, but even of them only 10,896 kilometers are paved or macadamized. Of the re-maining 7100 kilometers of roads, for the maintenance and improvement of of ocean-going ships.

He indicated this work principally concerned the subdivision of ships by bulkheads. While sea rules as to bulkheads. While sea rules as to bulkheads running cross-wise, which regulate buoyancy in case of mishap, are fairly satisfactory, he said, work remains to be done on bulkheads running lengthwise, which help prevent great lists to port or starboard such as were shown by the Vestris and the Empress of Ireland when sinking.

Professor Hovgaard explained that a preliminary conference will be held in the United States to instruct American delegates in the needs felt by shipbuilders and owners, and in the results of research carried on by the preparatory committees. Other committees, such as those on "Navigation" and "Radio," he said, are also at work.

maining 7100 kilometers of roads, for the maintenance and improvement of which the county councils are responsible, 5614 kilometers are macadamized, after a fashion. Conditions are worst of all in the new Province of Bessarabia, formerly part of Russia, where there are only 52 kilometers of good macadamized roads and a terrible lack of bridges.

The Director-General, Dr. Nicolas Hoisescu, cites Czechoslovakia as an example of a new state that has solved in a satisfactory way the problem of good roads. It recently concluded a 5,000,000,000 lei loan (about \$30,000,000 for road improvement. But Rumania, which needs as a minimum 720,000,000 lei yearly merely for the upkeep of roads, spends only about 100,000,000 lei for that purpose. The Director-General is insisting the preparatory committees. Other committees, such as those on "Navigation" and "Radio," he said, are also at work.

week, appeared well on his way to another championship title when he finished the second day of racing in the Diamond Trophy championship event here Wednesday with a total of 80 points to his credit. Ross Robinson of Toronto was in second place with 50 points, while Lloyd Gunther of Detroit and William Logan of Sf. John. N. B., were tied for third with 30 points each.

Two championship races were held

Springfield would have caused a triple first-place tie.

All the Philadelphia scoring came in the opening period when Cahill, Jackson and Peters broke through the springfield defense to score goals. Goldsworthy scored for the visitors in the opening period and Scott in the last. A crowd of 6000 enjoyed the match. The summary:

PHILADELPHIA SPRINGFIELD

Two championship races were held

Half-Mile Champlonship—Won by Jack Shea, Lake Placid; Alex Hurd, Toronto, second; Ross Robinson, Toronto, 'third. Time—Im. 20 2-5s. Five-Mile Champlonship—Won by William Logan, St. John, N. B.; Valen-tine Hialis, Utica, second; Ross Robin-son, Toronto, third. Time—15m. 28 1-5s.

RANGERS WILL NOT CALL MORE INDIANS

SPECIAL TO THE CHRISTIAN SCIENCE MONITOR SPRINGFIELD, Mass.—The New York Ranger management has sent word to George C. Stebbins, general manager of the local Arena, saying that it had decided not to recall another player from the Springfield Indians of the Canadian-American Hockey Lengue. For the last three days Russell Oatman of the Ranger squad has been here practicing with the locals and this was interpreted as a sign that the National Leaguers were preparing to recall one of the Indians and assign Oatman here.

Three weeks ago the Rangers recalled Melville Vail, most able of the Springfield scorers, and since that time the local team has been able to win only one game. The Springfield management is of the opinion that the Rangers will decide to assign Oatman to the Indians for the remainder of the season. SPECIAL TO THE CHRISTIAN SCIENCE MONITOR

the season.

It is also anticipated here that the Boston-Newark games, scheduled here on Feb. 27 and March 16, have been transferred to the Boston Arena. Attendance at games in this city has been far below normal of late.

SCHAEFER AGAIN Yale, Columbia and Cornell Fives Have Busy Week Ahead

Plays Brilliant Billiards to Elis to Have Another Chance at Basketball League Leaders-Ithacans Get in Two Games and May

heels all the way, was within two points of him.

Cochran by virtue of high grand average, took second place in the series, though tied with Edonard Horemans of Belgium, defending champion, and Kinrey Matsuyama of Japan in games won and lost, at 3-2 each. This is determined on a grand average basis, and Cochran averaged 25.6, to 22.89 for Horemans, and 21.63 for Matsuyama. This placed Horemans third and the Japanese, who led through the greater part of the series, heing defeated only by the Americans, drepped back to fourth position.

Cochran played far more brilliant cochran played far more brilliant game, but with invincible steadiness. Schaefer, who persevered in his careful tactics in spite of the brilliant rushes of his opponent, finally ended the battle with a run of 55 to settle it. The score by innings:

Schaefer (white ball)—0.96.2.35.2.169

Cochran (spot ball)—5.22.1.74.29.30.82

81.0.2—328. Average 29.3-11. High run—82. Referee—Albert G. Cutler.

Yale, Friday, and Columbia meeting Cornell at Ithaca, next Wednesday. Yale lost the opening game of the season to Pennsylvania, 35 to 19, the worst defeat sustained by a team in the present season to date but Yale has improved magnificently, having defeated the second-place Dartmouth team 25 to 24 and lost the second game between the two by only 35 to 34. The Elis will probably defeat Columbia Friday and if they can defeat Pennsylvateam 25 to 24 and lost the second game between the two by only 35 to 34. The Elis will probably defeat Columbia Friday and if they can defeat Pennsylvania also they will move into the title figuring. Columbia is not an easy opponent, however, with Donald Magurk '30, and George Gregory Jr '31 in scoring form.

With two games during the coming seven days, Cornell expects to see its scoring ace, Layton, move well up toward the top of the individual ratings. Layton has been in only three Charles Ballon '30, Columbia E. A. Bessmer '30, Cornell... Ept. P. K. Fodder '29, Yale... Yale... 'A. SQUASH TENNIS CLASS B DRAW

Seventy-Nine Candidates for the Championship Title Are Listed

SPECIAL FROM MONITOR BUREAU

NEW YORK—The finest list of entrants which have ever been included in the draw of the United States Class B squash tennis championship will begin play on Saturday, on the new courts of the New York Athletic Club, which have been specially selected by the national committee for the event as the finest series ever constructed. Seventy-nine candidates for the title are listed in the draw, made public Thursday by the New York Athletic Club committee, of which J. P. Leo is chairman.

Twelve clubs are presented as follows: Harvard Club, Yale Club, Princeton Club, Columbia University Club, Fraternity Squash Tennis Club, Park Avenue Squash Club, New York Athletic Club, City Athletic Club, Shelton Club, Elizabeth Town and Country Club and Short Hills Club.

Play will begin on Saturday at half past two, and will continue until the finals, now scheduled for a week from the following Tuesday. There will be no scheduled play on Sunday, but players may agree to play their first and second round matches on that day if desired. The complete draw is as follows:

NATIONAL CLASS B SQUASH

Second Round—Lower Half
Pither Miller, Elizabeth T. & C. C., vs.
winner of Holden-Van Gerbig match.
Barnwell Elilott, New York A. C., vs.
T. L. Bates, Yale Club.
David Dibbell, Yale Club, vs. F. M.
Warburg, Harvard Club.
Henry Reeva, Park Avenue S. C., vs. feated C. W. Button Jr., New York A. C., 10—15, 15—10, 15—5.

R. H. Reutter, Columbia U. C., defeated W. E. Chambers, New York A. C., 15—2, 12—15, 15—9.

Only Armin W. Riley and Edwin Muller showed up for Princeton Club against the Crescent A. C., and they divided the played matches, Riley offeating his fellow veteran, Charles M. Bull, 15—7, 15—11, w.ile E. W. Kleinert accounted for Muller, after a longfought battle, 11—15, 15—11, 18—15.

The summary: J. N. Schermerhorn, Crescent A. C., vs. Norman Dodd, Yale Club.

J. P. Carey, New York A. C., vs. G. W. Comiskey, New York A. C.

Women Composers in Chicago

Chicago

If THE concerts of the Chicago
Symphony Orchestra, given Feb.
3-9, accomplished nothing else, they were instrumental in setting up a landmark—a minor landmark, if you will—in the history of femininity in art. For the program of these performances contained the works of two women composers. With the exception of Mrs. Beach, the names of Barbara Giuranna and Yolanda Méro were those of the first women to be given representation in the concerts of the organization in all the 38 years of its existence. Boston has been kinder to women composers.

Mrs. Beach, Margaret Ruthven Lang, Helen Hopekirk, Germaine Tailleferre, Lili Boulanger, Ethel Leginters of the present and the past. He tages the world to forget their male competitions of the present and the past. He tages the world to forget their male competitions of the present and the past. He tages the with the everture to Weber's

of their works there and the end is not yet.

It is pleasant to record the considerable success which accrued to the compositions of Mme. Giuranna and Mérô, under the skillful and sympathetic direction of Mr. Stock. The former contributed a scherzo, "Marionette" and a suite, "Alpina Stolen by the Dwarfs of the Mountain," to the scheme of art; the latter was heard in a performance of a Capricelo Ungarese for piano and orchestra, the solo part of which she played herself. In balancing the scales of judgment as delicately as may be, it should be said that the larger measure of public enthusiasm was given to Mme. Mérô, who performed her Capriccio with extraordinary verve and brilliancy, and who well deserved the ovation that was hers; but that the victory of creative worth and of imaginative power went to her Italian colleague.

Barbara Giuranna, who was born at Palermo and who gained her musical training at the Conservatory of Naples, has it in her power to walk far down the path that leads to success in art. If she is to be judged by her "Marionette" and her suite,

walk far down the path that leads to success in art. If she is to be judged by her "Marionette" and her suite, her inclinations lie at present in the direction of the fantastic and the bizarre, in both pieces she manipulated her colors and effects—manipulated them with uncommon skill, it must be said—in order to stress the whimsical rather than the sentimental aspects of "programs" that might appeal to her imaginative virtuosity, which quality it also put into a performance of Strauss' tone poem "Don, Juan."

The symphonic happenings of the week included a performance of the Woman's Symphony Orchestra under the leadership of Miss Ethel Leginska. The organization, which quality it also put into a performance of Strauss' tone poem "Don, Juan."

The symphonic happenings of the week included a performance of the Woman's Symphony Orchestra under the leadership of Miss Ethel Leginska. The organization, which quality it also put into a performance of Strauss' tone poem "Don, Juan."

The symphonic happenings of the week included a performance of the woman's Symphony Orchestra under the leadership of Miss Ethel Leginska. The organization, which quality it also put into a performance of Strauss' tone poem "Don, Juan." might appeal to her imaginative sense. It has not been thus with the majority of women composers, but this is an age of music in which emo-

France has done the lion's share. But there is nothing leonine in its playing. None of these great rugged strokes of genius that came from the Joachim Quartet in former days; none of the flay intendity of the Bohemians; none of the stately breadth of the Flonzaleys. Nowadays nearly all string quartet parties concentrate upon polish. Of this silky-fine tone, and faultless reticence the Hewitt Quartet furnishes a typical example. At the first of its concerts in Æollan At the first of its concerts in Æolian Hall three master works of French string music were presented: the Quartet in F major by Ravel, the Quartet in D major by Franck, and the Quartet in G. minor by Debussy. The delicate pattern makings of Ravel were well within the players: interpretive scope, but the far vistas of César Franck's work, its other worldliness, its fervor, its symbolic dreams, lay beyond their mezzo voice reverence for the best, and her ca-pacity for finding good points in second-rate stuff that made accept-able her performances of such diverse things as "Gia il sole dal Ganges," by Scarlatti, "Spleen" by went by far the best because its emotional and dynamic range is the smallest. In the Poco lento of the first movement there was none of that glorious sound with which the that glorious sound with which the before this eager singer can deal Brussels Quartet of pre-war days used with Schubert's "Wanderer," or brussels Quartet of pre-war days used to make the opening as impressive as the surge of great organ music. In essentials it is organ music, and its extreme length reflects the leisure of organ extemporizations. Debussy's Quartet had the warmth which Ravel missed, and a concise symmetry absent from Franck. It was the work best played that afternoon. The Hessels are sufficiently as the work best played that afternoon. The Hessels are sufficiently as the work best played that afternoon. By John L. Howard, in the same gallery, is an exquisite small canvas, called "Mother and Child," a family record in solid, sure and slow concordance based on the King James George W. Hanley (published by the author at Dayton, O. \$2.) contains a painting. It was painted during a Version of the Bible, with special period of three months and is unreference to incidents, events and persons rather than to specific words. It is, in effect, an alphabetically arranged index to more than 3000 important events of the Bible. As it deals with the outstanding events in the lives of Biblical characters, it aids the students of the Scriptures to rewonders why there is no mention of John as the writer of the Fourth Gospel, or the book of Revelation. Perehaps the omission arises out of the uncertainty, when viewed from the standpoint of the "higher criti-cism," pertaining to the authorship of these important books. This little volume will be especially useful to Sunday school teachers, clergymen, and writers on Biblical subjects, who may not have the time or inclination to use the more comprehensive con-

> The Tragedy of Edward VII, by W. H. Edwardes (London: Victor Gollancz. 18s. net. New York: Dodd, Mead. \$5) is based on the theory that King Edward VII was the victim of circumstances which con-spired to prevent him from making use of qualities which were so exceptional (according to Mr. Edwardes) that the word genius occurs to the thought. If Edward VII was here today it is tolerably certain that this volume would make him laugh heartly, for he loved a joke. Mr. Edwardes adds nothing to our existing store of facts concerning Edward the elements of tragedy we feel that the author has exceeded biographical and even poetical license

Keith. (London: Hutchinson. 21s. net; Boston: Houghton Miffin. \$7.50) relates some of the experiences of the author during eight or nine years in Japan, Hokkaido, Korea, China and the Philippines. Readers of The Christian Science Monitor are familiar with some of Miss Keith's pictures; it now remains for them to realize that she handles also her pen with skill and charm. The book consists of letters sent home to friends and relatives during her many years of piloriprage to the Fermany years of pilgrimage to the Far many years of pligrimage to the Far East. Her book is essentially an artist's book, and there are issues, political and otherwise, upon which she hardly touches; her interest was centered in the people. There are a dozen fine illustrations from the author, weter colors and maintenant author.

its solemn character and it being symphonic pair brought to Cleveland superbly played by the members of Heinrich Schlusnus, admirable German baritone, heard in an aria from Borodin's "Prince Igor" and songs with orchestral accompaniment that included two of serious import Beethoven's "Die Ehre Gottes aus der Natur" and "Dem Unendlichen" of Schubert. For these songs of distinctly an oratorio type the splendor of the rich baritone voice, extended in range, full and clear in its highest notes, was telling in its effect. In two songs by Gustav Mahler of more playful character Schlusnus was less successful. The voice was outstanding characteristics.

The Philadelphia Civic Opera Company, at its last performance, added another to its impressive list of unTambourg'sell" and "RheinlegendTambourg'sell" and "RheinlegendTambourg'sell and "RheinlegendTambourg'sell and "RheinlegendTambourg'sell and "RheinlegendTambourg'sell and "Rheinlegendsmooth and beautiful in its lyric

but that was far from being the case in this performance which was sung in eloquent enunciation of the almost continuous tuneful text of its

being all taken by regular memoers of the company.

The work is melodious, this feature, however, lying more oft in the orchestra than in the voices. It has a moderate amount of dramatic music fitting the situation and rises to considerable heights in the first and the last acts. The music shows much of the influence of Massenet, who was Leroux's teacher, although some of the scenes are long almost to the point of tediousness. The orchestration is generally ineffective except in the closing act. Alexander Smallens, musical director of, the company, conducted with authority.

Smallens, musical director of, the company, conducted with authority.

as the philosophic observer looked down upon this drab monotony of hurrying, bobbing, rebounding, and interweaving brown Fedora hats he asked himself a few searching questions. What was the meaning of this timidity, this echolalia, this callous cynicism with regard to hats, and what did it portend for the future? He was a lover of his kind, disposed to roseate views, eager always to put the best construction upon to fustly brown, from brave to pusilcall out to the crowd from his eleva-Yard—so remarkably like the hats of the Yale Campus and of Oxford Quads in all essentials—cast a chill upon the hardiest optimism.

Those of us who are not philosophic and who never observe anything are too prone to take hats as son why, at the exact moment when they come, never striving to pierce their inner meanings or so much as

men. This historian of the for our more emotional utterances for our more emotional utterances. ally gather proof and corroboration after we have made them.) With this volume in hand he may sit a whole hat. Civilized man may be of headgear. The unicorned hats of of the hat. Civilized man may be tersely defined as a hat-wearer. As civilization climbs and advances hats flourish and efforesce; they increase in height and amplitude and variety; they ramify and extravagate; they they ramify and extravagate; they sure with its weight of metal and precious stones, but doubtless serviceable in a high wind. The hatless-ness of Greeks and Romans even in their greatest period perplexes him a little, even suggesting a flaw in his theory, but he decides that this is the exception that proves the rule. Coming up through the Middle Ages, he glows with delight to find that at every stage of advance in culture the hat becomes more fiamboyant and self-assertive. It parallels exactly, indeed, the development of the Gothic tower, blossoming into crenellations, putting forth a lace work of deficate drooping with golden knots and lace work of delicate tracery, pendent plumes. At the high tide of the Renaissance, that most splendid period the modern world has yet at-tained, the hat also reached its pinnacle of magnificence. For two centuries it maintained itself at this high level, as the por-

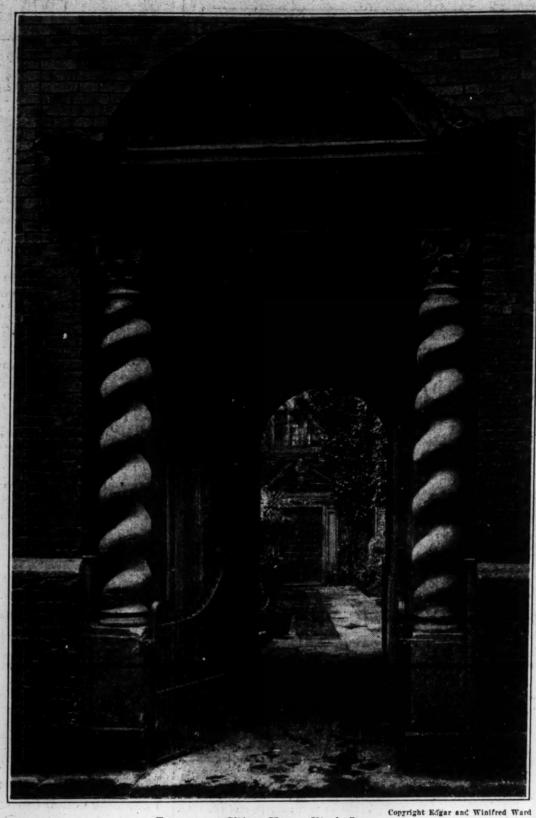

traits of gentlemen by Van Dyck can show us, and then, by little and the river, bringing their treasure little, it began to decline. Puritan with them, homeward bound. hats of the seventeenth centurystiff, heavy, uncompromising, and frequently ribbed with iron—retain a great deal of dignity; hats of the eighteenth century, particularly in France, are still recognizably hats; but after the French Revolution-ah. the heavy change! Then and there began that petty tyranny of the many-headed which has robbed the hat of its glory. Then and there was invented and asked the intimidating hat?" (This question be it noted is one man of another. It is not asked inquisitively or emulously, as by one who intends to seek out the same a similar specimen as soon as may be. It is not even asked out of curiosity, as by one who, after long re-searches in the lore of hats, suddenly encounters a new species and is impelled to trace it to its source. Ah no; it is asked in tones of scorn faintly tinged with astonishment. This question is one of the most withering in the whole armory of social satire, and the axiomatic belief lying behind it, the conviction value things according to their price.

that gives it force, is that all hats ought to be alike.) One did not ask this question, at One did not ask this question, at any rate in just this tone, of a gentleman in the grand old days when bles "with a whole soul's tasking," tieman in the grand old days when hats were really hats—three feet across, a foot high, laden with lace and gold thread. One did not ask it of a Mexican vaquero or a Texan cowboy in the days when his sombrero was worth all the rest of his equipment, including his horse and silver spurs. Or if one did, then not in just this tone. But today anyone may ask this question of anyone, and in any tone he likes, for hats have

may ask this question of anyone, and in any tone he likes, for hats have no defenders.

Such hats as we see about us, the philosophic observer would say, do not deserve defense, and he is positively glad to see them daily giving way to mere caps. He is delighted to see a considerable part of the male population of Europe and America returning to the sheer hatlessness of the savage and barbar well occasionally to miss the things of the caps in these priceless things. They are there for the taking.

Alice Freeman Patmer once told of a tensment dweller whose resolve day. She seemed to manage it even in her unprivileged place, and through the caps of the savage and barbar well occasionally to miss the things of the caps.

Provençal Portrait

The way out was along the valley to a break in the wall, which gav on the entrance to a little farmhouse set prettily against a grove of cypress-trees, and fenced by a low stone hedge. On the white walls brown streaks of lichen interlaced with the shadows of almond trees. A few paces from the front door, on fruitful arbour?

As I entered the gate I felt as if were about to break a spell. Had I the right to enter into this seclusion, this garden enclosed? There came prompt answer in the indignant bark of a dog; but in spite of the certain Begone! of that bark, it gave me conof Faery, but a very ordinary way-worn traveler seeking hospitality from a fellow-creature.

The dog barked loud and long. He

crouched low on his forepaws and humped his bristling hindquarters. He tried to look as savage as his bark suggested, but all to no purpose. An optimistic curiosity gradually got the better of him, and I could see by the cautious wag of his tail that it would soon overcome the loyal and conventional challenge. He looked me in the eyes and then turned to his mistress, who had hown no interest whatever; then, feeling assured that all was well, he wagged his tail the faster, his bark became at once an apology and a welcome, and as hearly as any dog could do it he introduced me to the statuesque old lady. This done he lessly at a passing bee, and with one eye closed lay down in the dust at the feet of his mistress.

The old lady now turned to me: Madame, it is hot." "Oul, it is hot." "With your permission, Madame, I may take a bowl of water from the spring?" "Mais oui, out, but will you not have a pomegranate also?" She plucked a delicious ripe fruit

The Balanced Character

THE statement that a well-bal- 147) Mrs. Eddy describes the balanced man has for ages been anced character in a remarkable held in thought as a worthy analysis of mental qualities, and deal needs no extensive argument thus encourages the practice of these to support it. One who is temperate, qualities and the elimination of the wise, self-controlled, and kindly has faults to which she refers. She writen, merely by affections which may some

Such a one surely does not as-

sume a superficial attitude or permit

his personal likes or dislikes to govern his actions. The adoption and practice of the rule of conduct inspired by Truth discloses the fallacy of living carelessly and trying to veneer an unstable character with "the color of virtue," which cannot conceal the mental make-up. A sheep's woolly hide thrown over a wolf would never transform the wolf into an inoffensive, gentle animal. According to Christian Science, forms those formerly ill-balanced and ill-tempered into persons of conscience and regard for the Golden Rule. Habits of indifference, lasiness, disregard for law and order, unkindness, and discourtesy vanish through the study and practice of the rules of this Science of Christianity: veals, as no other doctrine can, the and its beneficiaries become what their lives proclaim them to he, Christians whose worth to their communities may be judged by their

Through the process of sincere reformation, many in this day are being transformed through the understanding of Christ, Truth, made ossible in Christian Science; and manifestations of strict integrity are multiplying throughout the world. This Christian reformation is due to the fact that the understanding of abundantly satisfies thought with joy, peace, good will, and success. This honest and faithful self-reformation naturally fulfills the Scriptural axiom, "Whose trusteth in the Lord, happy is he."

Closing her wonderful analysis of "the man of integrity" in the book before mentioned, Mrs. Eddy writes: 'He never shows us a smiling countenance while he meditates evil against us in his heart. We shall never find one part of his character at variance with another." It is cause for gratitude that such a balance in true virtues is indeed possible for all who will strive for it by putting off the old man and putting on the new, as Paul of Tarsus recommended

The Line of Conduct

By CATHERINE PARMENTER

Part II

HAT game between Tyler minutes of desperate fighting on the Academy and Bradley Hall will part of Tyler Academy. But at the long be remembered in the annals of both schools. The first

long be remembered in the annals of both schools. The first quarter ended with the score 0 to 0.

"Make a goal this time!" whispered Peggy to Anne, as they took their positions on the floor for the second quarter.

Anne nodded brightly. It was going to be much harder than even she had anticipated, but her enthulasm was still high. Each side fought to make a basket; yet the guards were excellent and the forwards scarcely touched the ball. It seemed to be a contest between the guards and centers rather than one where the speciators were guessing which side would make the most points. At the ead of the first half the scoreboard still showed two zeros, while the yells of Bradley's rooters vied with those of the Academy's.

The Tyler team lay stretched on the floor in Miss Rogers' office.

"You're holding them wonderfully, girls," encouraged the coach, "but

"You're holding them wonderfully, girls," encouraged the coach, "but you must do better still, We've got to do something more than hold them: we've got to beat them! The third quarter is often the crux of the game, you remember. After a rest of 10 minutes, one may be apt to let down a bit rather than go shead all the stronger. Keep on fighting, girls, and Tyler will win!"

Deafening applause greeted the teams at the opening of the second half. The whistle sounded, and the 12 players were on tiptoe, alert and waiting. They fought harder than ever. Several times the Tyler for-wards had possession of the ball, but the guards were quick, and at the two-minute rest period between quarters the score stood again 0 to 0. A Last Game

last game of the season, and we can't let old Tyler be beaten!"

As the fourth quarter began, Anne glanced over on the sidelines, and Miss Rogers flashed her a smile that warmed her heart. It made her resolve to do more than her best! Yet she could not know that the coach was thinking there was no doubt of Anne's being a member of the first

Again the struggle was between the guards and centers. Minutes passed—the score remained unchanged. Then the Tyler side-center caught the ball, and Anne darted forward to receive it. But the guard was too quick for her. The ball was in the Bradley girl's hands, Anne, forgetting everything, seeing nothing but the ball, snatched it from her opponent. Turning swiftly, she tossed it to the spot where Peggy should have been, only to see it drop into the arms of the other guard, who threw it back toward Bradley's

it Anne stood absolutely still. In a flash the thought went through her mind that by snatching the ball from the guard's hands she had committed a technical foul. It had passed unnoticed by the referee, and Anne knew that her opponent, in the excitement of the game, had not realized her mistake. Bradley was entitled to a free throw for the basket! And then—
"Peggy," she called, "may I have "time out"?"

The centain gianced at Anne's

The captain glanced at Anne'

"Of course," she answered. "Miss Porter" (she spoke to the referee) "time out for Tyler, please." "I'm all right—just out of breath," Anne explained, as Peggy and the coach bent over her as she lay on the floor. "Go with the others, Peg,

and let me rest a minute." Anne Fights It Out

Anne closed her eyes. She had less than three minutes to decide whether or not to tell the referee. "What shall I do?" she asked herself.

Seconds were passing.

Then, as though seeing it in broad daylight, Anne beheld the face in the first thank the face in the face of a desk: the strong, gallant face of a great American—with the clear, kind large the face of a great American—with the clear, kind large the face of the tells us that this gift to the face of the fac great American—with the clear, kind eyes glowing with the light of a carry on the work of my grandfather. A hundred years ago he transformed a grim, desert island in the North Sea, 10 miles off the Netherlands the girl had once memorized for a mainland, into a bower of green verdeclamation contest, formed them- dure and trees to which came the selves in her mind: "I ask that we birds which made the island famous. see to it in our country that the Then, too, I was inspired by my line of division in the deeper matters grandmother, who said to her chilof our citizenship be drawn . . . on the line of conduct . . . the line that divides the honest from the dis-

"General Pershing"

The Training of a Homing Pigeon

By HELEN A. ORR

ISTER Pigeon sat dejectedly one hundred miles and are used for on the porch, cooling softly signal-communication and the long-as he watched his wife on distance birds are used chiefly by the the laying of the two little, white eggs in the round bowl that held the nest, Mr. Pigeon had sat on the eggs for a third of the time. But now Mrs. Pigeon had driven him away every time he had volunteered to continue his duty. He felt woefully abused. Finally, he flew about in the interior of the loft, but he kept coming back to look at his wife to know that all was well. Very quietly she sat, not even looking at him when he appeared. he appeared.

Then suddenly she turned and listened to something. She gave a little start. She moved slightly off one of the eggs. Raising her head, she took aim and with two strokes she cracked the egg open. There was her first born—a tiny bird, all beak and a shivering body! Immediately, the mother covered her helpless baby with her soft breast. And so the pigeon, "General

Pershing." was born! Homing pigeons make loving and solicitous parents. From the second day, the "General" automatically opened his beak and expanded his body like bellows every time one of the parents flew to the nest. The

The baby pigeon kept the parents busy all the time. The father brooded and worked for him no less hard than the mother. No wonder the child grew fat! His dingy color about his mouth and eyes, fell away.

A Pigeoneer Appears

When the "General" was but five days old, he had his first close experience with the pigeoneer, whom On Feb. 1 President Coolidge dedicated at Mountain Lake, Fla., a Lady of the Land, who represents our seized the baby bird. He put seamless aluminum bands on the pigeon's eg meant that the "General" had America—Mountain Lake Sanctuary gift to the school where she once taught than by any personal gift which could be made to her."

Whenever the parent birds fed the youngster was almost four weeks old. he was separated from his father and chairman, which took the first step mother and put into another comin solving the knotty problem of partment with other young birds. The following morning after the amends). But though the Dawes gry as he had had no food since his Plan drew up a scheme of annual parents had given it to him. He was payments, it set no definite limit to put into a basket and then placed the time of these payments—in other on the lighting board on the outside words, it did not fix the total amount of the loft. Then he heard that welstantly, the other birds had passed

But the "General," hungry The nations officially represented as he was, was interested in the great world outside and hesitated. at the conference are England, France, Germany, Italy, Belgium, Japan. The United States has also His hesitation brought a sharp re-proof and he dashed through the sent two unofficial representatives. Owen D. Young and J. Pierpont Morafternoon, the squeakers had another gan are two of America's leading trapping exercise and the "General" did not hesitate this time but went financiers, and Mr. Young has been elected chairman of the committee. through the door immediately.

After two days, the young birds
were taken a short distance from the

How Some Animals Sleep eree, in a surprised tone.

"It's only fair," repeated Anne.
The three minutes were over, but live by bread alone. This thought is hand an approving squeeze before she started onto the floor, Then she blew the whistle and announced:
"Anne Stevenson, Tyler forward, tells me that she unintentionally standard to the standard to the same that she unintentionally standard to the same to same the same th and trap as before. As they learned to fly, the distance was increased almost a mile away. At the end of a week, most of the squeakers had been trained to trap readily.

Foxes and wolves curl up, bringing By this time, "General Persums their noses and the soles of their feathers had changed in color. His dull gray-blue had a shine and gloss dull gray-blue had a shine and gloss dull gray-blue had a sleek, wide-awake look. between the forelegs. Hares, snakes and fishes are different from most He was growing up!
In the second week of training,

There was a moment of complete silence among the spectators and players as the Bradley girl, with puzzled frown, caught the ball and poised for the free throw. The ball rose in the air and with sure aim dropped lightly through the basket. A gasp of despair from the Tyler rooters was lost in the yells and applause of their opponents. For the scoreboard shewed Bradley 1, Two more minutes to play! Two

He avoided cooking are other subjects I shall be wide bodies of water by flying around them above the shore lines. Some-times he flew close to the ground, sometimes very high, depending upon the direction of the air currents. He always took advantage of the wind,

if possible.

But before "General Pershing" made a longer flight than 300 miles,

at him, but the pigeon made a dip esting caves. There are many figure which frustrated the big bird. Again made out of the soft rock or sand. the hawk dropped on him but the pigeon escaped in the nick of time. been bred and was the property of the United States Army. U S CAV on the right leg showed that the bird was bred by the army at Camp Alfred Vail, now called Fort Monmouth, and gave his serial number.

Was at first timid and afraid. Furthermore, he wore a whistle attached to his tail feather which made a peculiar sound as he flew through the air. The whistle was made of bamboo so was not heavy and caused him no discomfort, but the noise it made

so was not heavy and caused him no discomfort, but the noise it made was annoying at first. Perhaps the squeaker, as a young pigeon is called, a rattling sound was heard and as he grew older he associated this noise with feeding time. When the smart bird realized that his whistle away and so he did not mind the sound. Numbers of hawks had appeared in the vicinity of Fort Monmouth. So after seeing the "General's" experience with one, the pigeoneer had had whistles attached to his birds so that he could continue their training without descriptor. tinue their training without danger. The fliers could not make as good ime as usual, however, as the whisthey were not sent on long flights wearing them.

In due time, the "General" had regained his confidence and was flying with his usual speed and fearless-

The Big Race

Finally the date of the big race rew near. "General Pershing" with other birds was sent to Washington. The "Arrow of Gold" was the universal favorite, and everyone interested in the race expected him to win. The pigeoneer at Fort Monmouth, who knew the "General" best, had few hopes of his being the winner, although he considered him a reliable homer.

The day was lowering with low-hanging clouds. To make matters worse, there was a quartering wind, which would be against the filers.

At 10 o'clock, before a large crowd in front of the Army Building in the in front of the Army Building in the capital, Major-General Saltsman released his favorite, as well as the favorite of the entire signal corps, "Arrow of Gold." The onlookers applauded heartily as the hird circled about and took off. Other birds followed at 10-minute intervals. At 11:20 "General Pershing" started, but without especial attention.

At 4:39 p. m. the "General" had

The Mail Bag

to do so, thanks to the wonderful Mail Bag.

PACIFIC FRUIT MARKET OPENS FOREIGN FIELD

Shipments to Orient and to Tremendous Advantages South America Offer Profitable Outlet

BY A STAFF CORRESPONDENT SAN FRANCISCO—Fresh fruits vantages of investment trusts Fred G. in the opinion of shipping men here.

soon have world-wide distribution, in the opinion of shipping men here. This is based primarily on two developments: the recent rapid increase in refrigerator ship services touching Pacific coast ports, and the warm reception accorded California products in Asiatic and South American markets within the last year.

Refrigerator services previously have been from the Atlantic seaboard, necessitating a long and expensive rail journey for California produce dispatched to consumers overseas. Under such an arrangement only the finer grades sold in European markets could be handled shipping facilities at hand, and with at a profit. Now with much cheaper markets opening in other quarters of the globe, California farmers are looking far afield for relief from overproduction.

Adequate cold storage facilities near western docks is more a problem than the need for refrigerator ships. According to William J. Mitchell, chairman of a committee appointed by C. C. Young, Governor, to survey the field for such a ware values. Knowledge of values and according to William J. Mitchell, chairman of a committee appointed by C. C. answer, with the result that cars and engines needing repairs ran until they were useless.

One Makes Profit

What a Chinese railway can do under normal conditions is illustrated by the Tsingtao-Tsinan railway in Shantung, under the protection of Japanese soldiers since last April. During that time, the Chinese administration which operated the line before has remained intact. The Japanese have simply prevented war lords from using the line for their own purposes or from diverting revenues. The result has been a profit of \$20,000,000 silver in six months, whereas the line had not early in 1927.

The Nanking Government does not attempt to deny that the war lords still control the railways. An example of this domination occurred recently, when four foreign ministers were returning from Nanking to Peiping on a special train. When they arrived at Chengchow a subordinate war lord from Hankow came along, and his engine gave out. He promptly demanded the engine on the ministers' train and paid no attention to railway officials' protests. The ministers waited several hours until another engine could be found for them. The war lord who acted in this fashion was so obscure that many for them. The war lord who acted in this fashion was so obscure that many foreigners in Peiping had never heard of him. He was in no particular hurry, but he regarded the railways as his own property.

But Nationalist civilian officials are showing a new boldness in criticizing war lords. The militarists seem to

showing a new boldness in criticizing war lords. The militarists seem to realize that they must act more cautiously, with more regard for the people's good opinion. It is not likely that they will yield quickly to civilian control of the railways.

Wireless Pact Signed SHANGHAI (P)—The Nationalist Government's Reconstruction Com-mittee directing the development of wireless communication in China, has signed an agreement with the Radio Corporation of the Philippines for handling traffic between Shanghai

Under the contract, the Chinese onder the contract, the Chinese will take over the French wireless concession. Income is to be equally divided and rates will remain un-changed.

gard to the requirements of the lines. Military control of the railways for five years has practically ruined them. For profitable and efficient operation, they will have to be rebuilt almost entirely, according to the expert opinion of John Earl Baker, former American adviser to the ministry of communications here, who visited China last summer and autumn. Mr. Wang Tseng, vice-minister of railways at Nanking, declared in a recent interview at R. declared in a recent interview at R

who visited China last summer and autumn. Mr. Wang Tseng, vice-minister of railways at Nanking, declared in a recent interview at Peiping that \$25,000,000 gold will be sufficient to rebuild the lines so that they will be as good as they were in 1924, when the war lords first discovered that they made delightful toys.

This estimate, however, is regarded by foreign experts as too low. They believe that 50,000,000 gold dollars will be necessary to restore the existing railways to first-class condition, and this does not allow for any of the needed extensions. Practically all rolling stock is on the verge of collapse; through neglect and ignorant operation. Warlords who gave orders to move trains did not permit "No" as an answer, with the result that cars and engines needing repairs ran until they were useless.

One Makes Profit

"A properly constructed investment damit of divided aims, side activities, dualified or variable objectives. It is money through the medium of investment, with safety. Internal stability is a matter of great importance. The makes for integration.

This estimate, however, is regarded by foreign experts as too low. They believe that 50,000,000 gold will be sufficient to divided aims, side activities, dualified or variable objectives. It is money through the medium of investment, with safety. Internal stability is a matter of great importance. The makes for integration.

This estimate, however, is regarded by foreign experts as too low. They believe that 50,000,000 gold will be sufficient to divided aims, side activities, dualified or variable objectives, it is interested in one thing only—to make money through the medium of investment trust. The success of integration.

Preferred Shares 6% - Cumulative

Par value \$100. Preferred as to assets and dividends over the Common Shares. Cumulative dividends payable quarterly January 1, April 1, July 1, and October 1. Redeemable at the option of the Association in whole or part on any divination of the Association to par and dividends except that if upon such liquidation all the assets are transferred to a new company or association preferred shareholders may be entitled only to receive one prevoting unless dividends of 6% are in arrears or except on question of creation of superior or parity classes of preferred shares, or of increase of authorized amount of preferred shares.

HARRIS TRUST AND SAVINGS BANK, CHICAGO Transfer Agents

THE FIRST NATIONAL BANK OF BOSTON

Under the present Federal Income Tax law dividends on these shares are exempt from the Normal Tax. Dividends when received by Corporations are entirely exempt from all Federal Income Taxes. The Association agrees to reimburse Preferred shareholders upon appropriate application for the Massachusetts Income Tax not in excess of 6% per annum. THE NORTHERN TRUST COMPANY, CHICAGO Registrars

The following information has been summarized by Mr. Frank D. Comerford, President of New England Power Association, from his letter to us, copy of which may be had on request:

Business: New England Power Association is a Massachusetts Voluntary Association formed under a Declaration of Trust containing provisions designed to confine liabilities and obligations to the assets of the Association. Its operating companies constitute the largest power system in the New England States. During 1928 the sales of electrical energy exceeded 1,080,000,000 kwh. The System serves directly and through contracts with local distributing companies a population of more than 2,500,000 in over 250 communities in Massachusetts, Rhode Island, New Hampshire, Vermont and Connecticut.

Properties: The properties of the operating companies include eleven hydro-electric stations with an aggregate generating capacity of 285 000 km. and six steam electric stations with an aggregate generating Capitalization:

Upon completion of this financing, the capitalization of New England Power Association including subsidiary companies, held by public, will be as follows:

New England Power Association: Common shares (no par value).

Preferred Shares 6% (\$100 par) Cum. (incl. this issue).

\$49,773 Shs.

\$54,826,400*

25,000,000 Subsidiary Companies:

*\$102,824,800 par value authorized. **This item includes 495,486 no par value shares of Preferred Stock and 16,368 no par value shares of Class A Stock of The Rhode Island Public Service Company which are taken at liquidation value of \$33 and \$100 respectively, other preferred stocks and all bonds taken at par.

†Taken at par and including \$1,777,562 surplus and paid in premiums applicable thereto. Earnings: The Consolidated Earnings of the Association and its controlled operating companies for the

Balance of Net Earnings before Preferred Dividends, Depreciation, etc..... \$8,324,955

For the year ended December 31, 1928 Balance of Net Earnings as shown above was 4.04 times the dividends on the Preferred Shares actually outstanding during the year. Such Earnings less ferred Dividends.

1. 1928 Balance of Net Earnings as shown above was 4.04 times Depreciation (as set forth in the President's letter) of \$2,289,002 were 2.93 times such actual Preferred Dividends.

The annual dividend requirement of the Preferred Shares presently to be outstanding, including this issue, is \$3,289,584 and such Balance of Net Earnings was 2.55 times such requirement before such Depreciation and 1.83 times such requirement after such Propreciation. Such Balance of Net Earnings does not reflect any income from the proceeds of this issue of 200,000 Preferred Shares.

Based on February 7, 1929 quotations for Common Shares of New England Power Association there is a market value equity back of the Preferred Shares of over \$76,000,000.

\$97 per share and accrued dividend

These Preferred Shares are offered for delivery when, as and if issued, and received by us and subject to approval of counsel. It is expected that temporary share certificates will be ready for delivery on or about February 25, 1929.

in promoting another rally which shoved some stocks materially above the preceding close. American Express gained 12 points, American Express gained 12 points, American & Foreign Power 5. American Railway Express 4½s, and Warner Bros. Pictures 4 points. Adams Express railled from 402 to 410. Speculative selling was renewed before the close, however, and the closing tone was heavy. Total sales approximated \$700,000 shares.

Foreign exchanges, opened easier, with sterling cable down 3-32 of a cent to \$4.55 \u00e4-15.

Fires in the early bond market today moved downward in sympathy with the stocks, traders displaying uneasiness over the New York Federal Reserve Bank directors' meeting today. Trading was on a small scale, and most of the price changes were fractional. Time money was firm.

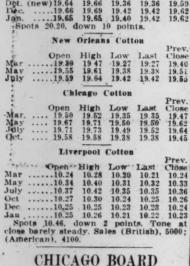

Anaconda Copper 7s in the early dealings failed to respond to reports the stock would be split two for one and sold fractionally under yesterday's close. Two other speculative leaders displayed a weak tone. Alleghany Corporation 5s selling near yesterday's closing figure, and American International 5½s declining.

Rails also encountered selling. St. Paul adjustment 5s slipping back to 78%. Pronounced weakness was displayed by the utilities. International Telephone convertible 4½s lost ground.

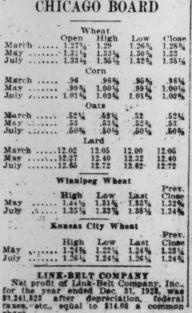

The foreign list was generally lower.

The foreign list was generally lower. Curb bonds were reactionary, Asso-clated Gas & Electric 5½s declining

A Recommendation for Nineteen Twenty-nine

IME is money as every business man realizes. He who knows best how to utilize it makes the greatest success.

The busy man will find far more time to make his business a success in 1929 by placing the burden of the tedious details incident to successful investing upon our Trust Department. Not only will he be relieved of all worry in regard to his present holdings which a special committee constantly checks and rechecks, but he is assured of a service which will offer sound advice during the year.

Our officers at any of the three offices will welcome an opportunity for personal discussion of your affairs with you.

The following is summarized from a letter of Mr. F. L. Carlisle, President of the Corporation:

Business: Eastern States Power Corporation was organized under the laws of the State of Maryland on October 23, 1925 principally for the purpose of acquiring and holding securities of public utility, industrial and other companies. The Corporation is also empowered to underwrite issues of securities, to act as fiscal agent and to deal generally in securities, especially those of companies interested in the development of the electric light and power

Holdings: The Corporation holds as its principal investment 187,500 shares of the common stock of St. Regis Paper Company, which holding represents 25% of the total amount of common stock at present outstanding. The Corporation also owns stock in Buffalo, Niagara & Eastern Power Corporation, Niagara Share Corporation, Mohawk Hudson Power Corporation and other companies.

St. Regis Paper Company, organized in 1899, is one of the largest producers of paper in the United States and also controls extensive public utility properties in New York State, represented by its ownership of 1,500,000 shares of Northeastern Power Corporation Common Stock, over 52% of the total amount outstanding. This investment, carried on its books at approximately \$22,000,000, has a current market value of \$75,000,000. The Northeastern Power System serves with electric light and power a territory in New York State extending from the Canadian border on the north to the main line of the New York Central Railroad on the south and from Lake Ontario on the west to the Adirondack Mountains on the east. It owns generating stations with a combined installed capacity of over 200,000 horsepower, of which 190,000 horsepower are hydro-electric. In addition, it owns undeveloped water powers with a potential installed capacity of 200,000 horsepower. The System is interconnected by high tension transmission lines with the Mohawk Hudson Power System, the Buffalo, Niagara & Eastern Power System and the St. Lawrence County Utilities System.

In addition to its stock ownership in the operating subsidiaries comprising this System, Northeastern Power. Corporation had investments in securities of non-controlled companies (at market value), advances to subsidiaries or affiliated companies, cash and call loans, as of December 31, 1928 in excess of \$40,000,000.

Earnings: The sources of the Corporation's earnings are income from investments, underwriting fees and profits realized from the sale of securities. For the year ended December 31, 1928, the actual earnings from all sources, less expenses, taxes, interest paid and reserve for Federal income taxes, as certified by Messrs. Haskins & Sells, Certified Public Accountants, amounted to \$1,914,552.64 against dividend requirements on the Preferred Stock, including this issue, of \$640,000. The net income available for dividends for the three years ended December 31, 1928 averaged \$1,094,306.54. These earnings do not reflect any income to be derived from the proceeds of this issue. Adding four per cent interest on such proceeds, the above average net income would exceed \$1,320,000 or more than twice the total dividend requirements on the Preferred Stock including this issue. The above net income for the year ended December 31, 1928, likewise adding four per cent interest, would exceed \$2,140,000, equal to over three times the above dividend requirements. The income derived by the Corporation from dividends on securities now owned and from interest on loans, (if continued at present rates) without any benefit from the use of proceeds of this issue, would be equal to more than the total dividend requirements on the Preferred Stock including this issue.

Equity: The 100,000 shares of Preferred Stock Series "A" and Series "B" are followed by 539,234 shares of Class B Common Stock, actively traded in on the New York Curb Market, which at current prices have a market value of over \$24,000,000.

Purpose of Issue: The proceeds from the sale of this issue of 60,000 shares of Preferred Stock Series "B" are to be used to acquire additional public utility and industrial securities and for other corporate purposes.

Price \$100 per Share and Accrued Dividend

BOSTON & MAINE PAYS ACCRUALS

Funds From Sale of Bonds Will Clear Up Back Dividends on Preferred

Directors of Boston & Maine Rail-

Directors of Boston & Maine Railroad, Tuesday, voted to holders of unstamped first preferred shares a dividend which clears up accruals on that
stock. The dividend is payable Feb.
28 to stock of record Feb. 15.

The board announced that in order
to prevent reduction in the railroad's
available cash which would have resulted from payment of the dividend,
they had obtained subscription to an
issue of \$2,400,000 three-year 5 per
cent general mortgage bonds, to be
dated March 1. The Interstate Commerce Commission and the stockholders will be asked to authorize this
issue, which will reimburse the treastury capital expenditures.

The back dividend on Boston &
Maine first preferred stock, classes A,
B C, D and E, applies to the amounts
which had accrued between July 1,
1920 and July 1, 1925.

These amounts and the number of
unstamped shares outstanding of each
class are:

A-\$21.50... 50,211 D-\$43.00... 11.261
B- 34.40... 18,137 E- 19.35... 140
C- 30. 9... 15,477

A statement by the board says that
the road has received subscriptions

under a provision by which they may share equally with common stock-holders in any dividends that may be declared after 6 per cent has been paid on the common stock in any one year.

NO MAJOR DECLINE IN STOCK PRICES IS ANTICIPATED

NEW YORK-Uncertainty and concern over the credit situation is not cline in stock prices, according to the

strated and in 1927. Preferred was retired Jan. 15, 1927.

Operations Approximate War-Time Peak-Semi-Finished Steel in Short Supply

bulk of the 2950 cars ordered by the Hilinois Central and 1400 by the Pere Marquette. Track fastening business of the last few days includes 10,000 kegs of spikes and 7000 tons of the plates. Car orders placed Dec. 1 with western shops, figuring 25 tons to the car, call for nearly 800,000 tons of finished steel.

call for nearly \$00,000 tons of finished steel.

Less is heard here of price advances than in the East, but any concerted upward movement is certain to be reflected. Discussion generally hinges on a \$2 a ton rise on hars, plates, shapes and sheets. On tonnage business, especially for the automotive industry, wire products and alloy steel bars have been shaded.

Quiet coverage of second quarter pig iron tonnage has been fairly heavy with \$20, Chicago furnace, holding steadily. Competition for business in Indiana has increased, as Mahoning Valley furnaces, needing business are reaching out January coke shipments from Chicago and Milwaukee ovans were a record.

United States Moth Factory

NE of the world's most famous planes, the de Havilland "Gypsy Moth" airplane, is being produced by the Moth Aircraft Corporation in its new factory on the corporation in its new factory of the corporation in its new factory of the corporation in its new factor Lowell (Mass.) Municipal Airport.

instruction, both primary and "aero-batic," for private ownership, and for cross-country commercial flying with pay loads up to 400 pounds. The plane has been rigidly tested abroad for over four years in actual service once a week in the past four years.
Much of this flying was done on long cross-country trips, among which were the flight of Captain Stack to India in 1926; Lieutenant Bentley's flight from London to South Africa and return in 1927, and the Hon. Lady Bailey's remarkable 18,000 mile solo performance to South Africa and reperformance to South Africa and re-

ream of Pollack and Mering controlled to the program.

The orchestra showed itself to be in good form in "Danse Barbare," while the duo planists poured a twinkling for planes in its category, attaining something over 21,000 feet. In August, Daisy," and Mr. Vetell made something over 21,000 feet. The August, Daisy, and Mr. Vetell made something over 21,000 feet. The August, Daisy, and Mr. Vetell made something over 21,000 feet. The August, Daisy, and Mr. Vetell made something over 21,000 feet. The August, Daisy, and Mr. Vetell made something over 21,000 feet. The August of Mr. Vetell made s 1928, piloted by Capt. Hubert Broad. it broke the F. A. I. duration record for light airplanes by remaining in

Gypsy Moth, as produced in nickel in the slot planos. light planes. The Gypsy Moin, as production this country is identical in engineerbia at 10 opened with an interesting bia at 10 opened this country is identical in engineering and standards in construction with the British built ship, although the capital, labor and materials used are entirely American. It incorporates the de Havilland folding wing system, which permits the plane to be stored in a place 10 feet by 24 feet long. The wings are of standard wood construction, with spuce longerons, conventional ribs, and very strong interior drag bracing whose compression members are of steel tubing. This wing structure follows the trussing of the Moth airplanes which were dived to a speed of 170 mles per hour last summer by British military pilots in attaining speed to perform the "outside loop."

The fuselage is of standard chrome-molybdenum welded steel tubing, exceptionally rugged, and rigid throughout. The landing gear is of the conventional split-axie design, utilizing rubber blocks in compression with a friction piston to of view, Rimsky-Korsakoff's "Flight" to propose to the capital, labor and materials used are entirely American. It incorporates the definition that the month of the built destats are being encouraged, 6, the Dutch East Indies S., and Caylon, with an interesting tak on the notable cases of rescue through the pof radio in past through the plot of radio in past through the pof radio in past tis noteworthy that the world's stations is networthy that the world's stations are increasing. This country, the numbers of the bestrait settlements 1 each.

Australia has 24 radiocasting stations to New Zealand's 5. The 15 in the order of the world combined. It has 519 stations to New Zealand's 5. The 15 in the order of the world combined. It has 519 stations to New Zealand's 5. The 15 in the order of the world combined. It has 519 stations to New Zealand's 5. The 15 in the order of the world combined.

sign, utilizing rubber blocks in compression with a friction piston to overcome landing shocks. An idea of its sturdiness can be gained from the fact that, in testing the action of the slotted wing gear, the Moth was stalled at over 200 feet altitude and permitted to settle to the ground in the stalled condition. The wheels are of ample oversize and the tail skid is steerable.

The aileron control is of the differential variety, giving an excellent degree at lateral control at speeds even below the stalling point. The large tail surfaces and balanced rudder permit a degree of maneuver-

ability usually found only in fast played by Sir Hamilton Harty and

adds greatly to the stability of the record 67096. Sophie Braslau sings plane near the stalling speed, and the "Erl King" on the same com-

Music in Boston

The Flonzaley Quartet

The Flonzaley Quartet, that superb group composed of Adolfo Betti and Alfred Pochon, violins, Nicholas Moldavan, viola, and Iwan D'Archamheau, 'cello, gave its farewell Boston, concert in Jordan Hall last night.

My Life."

The disbanding of this quartet firmed by the Senate. marks the end of another epoch in the musical life of the entire world.

With standing room at a premium and surrounded by some 150 people upon the stage, these players gave a performance which inclines one to use the word "perfect." At the conclusion of the Smetana quarter the audience rose as one person, applauding as a Boston audience sel

dom applauds.

At the close of the concert, a testimonial dinner was tendered the quartet in the small ballroom of the Copley-Plaza Hotel, at which time Mme. Helen Stanley, the only artist to have performed an entire work with the quartet during its 25 years of active service, sang a group Schubert songs in a thoroughly charming manner. She was accompanied by Jesus Maria Sanroma, newly returned from European triumphs. Tributes were paid to the quartet by the Rev. Edward Caldwell Moore, Dr. Richard Cabot, Prof. Wal ter R. Spalding, Wallace Goodrich and Louden Charlton. G. M. S.

BOSTON A. A. MEETS

One of the best amateur hockey games of the season, so far as Boston is concerned, is scheduled to take place at the Boston Garden this evening as a feature of the American Legion Ice Carnival. It will bring together the Boston Athletic Associa ion and the University Club sexters Outside of the big college teams these two teams are generally regarded as the strongest amateur teams in the United States and, as the rivalry is very keen between them, a great game is expected.

the Crimson. University Club defeated Harvard when George Owen was on the team, but lost in the second engagement, while the B. A. A. lost the first time the teams net, but won the second game. The University team is regarded as the for many years, said they had been stronger of the two in its forward line, with the Unicorn representatives stronger on the defensive. In addition to the hockey game there will be fancy skating by some of the leading amateur and pro-fessional skaters of the country, in-cluding Mrs. C. B. Blanchard and N. W. Niles, both former United States champions; Miss Maribel Vinson, present United States champion: and Norval Baptie and Miss Gladys Lamb. There will also be speed skating, a comedy hockey game and a brilliant military

NEGRO SCHOOL DEDICATED PECIAL TO THE CHRISTIAN SCIENCE MONITO WILMINGTON, Del. — The New Howard High School Building, for Negro pupils, was dedicated Feb. 12 in the presence of a number of notable educators of both races. It is the gift of Pierre S. du Pont and is said to have cost \$1,000,000.

1928 Aviation Progress Told

PROGRESS of commercial aviation in the past year has expectation, according to the second report of the Daniel Guggenheim Fund for the Promotion of Aeronautics, covering the year 1928.

"Probably the outstanding aero-

"Probably the outstanding aero-nautical achievement of 1928 was the demonstration in America by private interprise that air transport can be made a profitable business without government subsidy," states Harry F. Guggenheim, president of the

The American pioneer air mail contractors, by their courage and business ability, have surprised the world by this quick and convincing demonstration. The air trans-portation services have been extended in number and route; output of aircraft has enormously increased and for the moment lags far behind the demand; and scientific research is approaching a solution of the few remaining aeronautical problems.

"Perhaps there is no better indica-tion of the popular confidence in aviation than the recent large scale others. investment of public capital in both air transport and aircraft manu-facturing companies."

With Congress Day by Day

A bill to provide \$500,000 for the acquisition of a residence for the Vice-President was introduced by Ernest W. Gibson (R.), from Vermont.

President Coolidge recommended to Congress that \$595,000 be made available for the Federal Board of Vocational Education for the fiscal year 1930. It would be used for carrying on co-operative education in agriculture and economics.

The President recommended that \$208,000 be made available to the national advisory committee for aeronantics for research. The House passed the Kiess bill to

make various changes in the cor-poration laws of the Philippines. The measure now goes to the Senate. Adoption of his resolution to investigate the federal farm loan bank system was again urged upon the

Senate by Cole L. Blease (D), Senator from South Carolina.

The Senate accepted House amendments to the bill of Ellison D. Smith (D), Senator from South Carolina amendments to the bill of Ellison D. Smith (D), Senator from South Carolina (D), Senator from South Ca Senate by Cole L. Blease (D), Senator from South Carolina. ments to the bill of Ellison D. Smith (D.), Senator from South Carolina, to authorize an appropriation of \$6,000,000 for loans in storm areas in southwestern states. The measure

his approval.

Concert in Jordan Hall last night.

The program included a Mozart son of West Virginia, Harold Lain C minor, Op. 51, No. 1, and the Smetana quartet in E minor, "From of Mississippi as members of the Federal Radio Commission were constituted by the Senate.

The House passed a bill to provide One finds it difficult to express, adequately, the high esteem in which these gentlemen have been held.

Difficult also is the formation of a upon the government and economic instruction. just and accurate estimate of their conditions in the Philippine Islands. tremendous contribution to musical The measure now goes to the Senate.

The House Judiciary Committee approved the Senate bill to authorize ayment of \$559,373 to the State of Connecticut for advances and expenditures made by that state during the war of 1812 with Great Brit-

TELEPHONE INQUIRY MOVE IS DEFEATED

Proposal for an investigation of rates and charges of the New England Telephone and Telegraph Company by a special state commission was voted down by the Massachusetts House of Representatives after brief debate. Anthony A. McNulty, author of the resolution, declared rate in-creases made in 1925 were excessive. Thomas R. Bateman replied that these brought a relatively small increase in revenue, which has been

used in giving improved service. The House advanced to third read-ing on a voice vote a bill to make UNIVERSITY CLUB vaccination compulsory in private schools in the State, as it already is in public schools. Roland D. Sawyer gave notice that he will offer an amendment to remove the age limit by which the bill at present would apply only to children under 14 years old, and will propose to make it 23 es.

SHIPS FOR STORAGE, NEW PLAN IN MAINE

PORTLAND, Me. (A)-Negotiations Each has met Harvard twice this for the purchase of 15 salling vessels, season and each has won and lost to now moored in Boothbay Harbor, to be used for storing baled pulp and other commodities in Portland Har-bor, were reported today.

Representatives of the owners of the schooners, which have been idle appointed by an agent for an organi Steel Company. Ship men here said that the use of old vessels for storage was common on the Pacific coast.

RAINBOW GIRLS ADOPT ADVISER'S HUSBAND

SPECIAL TO THE CHRISTIAN SCIENCE MONITO

WEST MEDFORD, Mass .- Philip

A. Jerguson, Most Worthy Grand Pa-

tron of the General Grand Chapter, Order of Eastern Star, is the latest member of the Jerguson family to be "adopted" by the Rainbow Girls. At a recent meeting of the West Medford Assembly No. 4, Order of the Rainbow for Girls, he was reship. Mrs. Jerguson is the Mother Adviser of the assembly and their daughter, Mrs. Virginia Jerguson Brooks was its first Worthy Adviser

One Minute Biographies

Who: WILLIAM PRINCE OF

Why famous: The founder of the

Holland, Utrecht and Zeeland, But

William's surname of The Silent came, according to tradition, because of an incident during a hunting trip in France with King Henry II. The

French king betrayed a plot hatched by himself and Philip of Spain to de-stroy Protestantism in the Nether-

lands. Now William, who had become a faithful Protestant, knew nothing

of this and realized at once the hor-

rible implications; yet he never gave evidence of surprise or alarm at hearing the news. Hence history has

Respect may be wholly on one side; regard and esteem are more frequently mutual. It rarely implies undue consideration or favoritism.

What They Say

Herbert Hoover: "We cannot in fairness continue to provide specialized education free to the few who propose to enter the professions while denying education to the many for the commoner vocations."

L. C. M. S. Amery: "I do not value black and white agreements amony nations as much as I do a bette mutual understanding and a stead fast friendship between them."

Margaret Curries "If you are in-different to your work and your thoughts are busy with something else, you might as well not be there at alt."

Gratitude

I Record only

Washington The Master's statement that some things hidden from the wise and prudent are revealed to those of simpler understanding, was beautifully lituatrated when, shortly before Christmas, the family laundress lost her necketheds conshortly before Christmas, the family laundress lost her pocketbook containing not only the money she had for her daily needs, but also that which she had set aside to give happiness to others at Christmas time. At the close of her day's work, her employer handed her an extra bill with her pay saying. "There is a little for Christman."

Instead of looking at the money, or thanking her employer first, she looked up with joy on her face and said, "Oh, thank you, Lord! I knew you would provide!" To her the Eather was recognized as the giver of all good gifts.

The Friendly Farmhouse MRS. I. M. V., Alger, Mich., shares with the Sundial a story of a

We with the Sundial a story of a dog's devotion to new-found friends. A family living in a town about 200 miles from Detroit decided to move there for the winter. They planned to make the trip by motor, and after driving about 50 miles the first day, they concluded to stop over night with a friend. The dog had never been there before. Next day they drove the 150 miles on to Detroit where the animal remained a week. Finally, out of the maze of the city streets with thousands of automobiles, and courtry roads, the dog found its way back to the farmhouse where it had received especially kind treatment during the one-night's stay. He continues to make it his home.

First Page News

MRS. M. D. N. draws our attention to the little item which has been carried at the top of the first page of the Kansas City Times during the days of cold and now. Under the heading: "The Birds Need Your Help" it says: "Don't forget to put out food for the birds. With the ground still covered by anow and more cold weather here, they find it increasingly difficult to survive." On behalf of the birds, Mr. Editor, the Sundial thanks you.

last the idea came to make a Happy Family Book. This is how they made

First they collected same copies of newspapers, and in these they found advertisement pictures of a little girl, her baby sister, and her Daddy and Mummy. These were just what they The lack of vegetation in Iceland wanted. They cut them out, very carefully, and then arranged them in a is attributed largely to heavy winds. nice hig scrapbook.

Now this was the part which needed a lot of thinking about. You must not forget that they were mak-ing pictures of a happy family, so to do this properly they had to think of a little story to make it seem more real. They called the little girl Mary, and her little sister, Babs. On page No. 1 they decided to show

advertisement) the picture of a breakfast table, and stuck this in the middle of the page. Then they pasted Daddy near the table, Mary running up to him to say good morning, and Babs close behind her. There was no room for Mummy, so they had to pretend that she was in the kitchen preparing the breakfast!

They cut out some chairs and pasted them in the "room," a grandfather clock, and a nice fat cat, curled up under the table. When the

paste was quite dry they painted

everything in the nicest colors they

Congress Counts the Electoral Votes

DRESIDENT-ELECT HOOVER is engaged in selecting his Cabinet, but not until February 13 were the formalities of his own election completed. On the second Wednesday in February the electoral votes are formally counted in Congress. The statute is most explicit in prescribing the procedure. The votes of the states are tabulated in alphabetical order. They are opened by the president of the Senate and are counted by tellers. No debate is allowed. No question can be put by the presiding officer except on a motion to withdraw. The procedure in case of disputed returns is set forth. Every formality is cared for except the notification to the President and Vice-President-elect. The president of the Senate announces "the state of the vote, which announcement shall be deemed as sufficient declaration of the persons, if any, elected President and Vice-President of the United States." Mr. Hoover must read the Congressional Record if he wishes to see the official announcement.

The ballots of the presidential electors have been in Washington for several weeks. The electors meet in their several state capitols on the second Monday in January. Formerly the practice was for three certificates to be prepared. One was sent to the president of the Senate by messenger; one was forwarded to him by mail, and the third was filed with the judge of the district in which the electors assembled. Last year Congress made it unnecessary for the certificates of the votes to be brought to Washington by messenger. The Post Office Department is now the only reliance for transmission, but an official record is still kept in every state. Legally, of course, it would be possible for an elector to disregard the popular verdict in his State and to cast his ballot for the person of his choice. Actually, however, the custom of the electoral college, being no more than a registering machine, has become so fixed that the exercise of such legal power would be denounced as unconstitutional. All possibility of this, however, is over on the second Monday in January. It is then that the President and Vice-President are really elected.

Public opinion takes little account of these leisurely arrangements, which date from the days of the stagecoach, when intelligence could not be transmitted by electricity. The President is really elected in November; he is legally elected in January; the votes are counted in takes office on March months after the people have spoken, their voice may be disregarded. A President who may have been defeated or one of another political party stays in office. Congressmen who have failed of re-election continue to legislate. The Senate on four occasions by overwhelming votes has favored a resolution submitting to the state legislatures a constitutional amendment to change this time-table. The resolution has not been acted upon in the House. If it were submitted to the state legislatures and accepted by them, the so-called "Lame Duck" session of Congress would be a thing of the past, and the President would come into office two instead of four months after his election.

Is Not Peace Practical?

TF THE nations of the world are to secure for themselves a stable and lasting peace it will be helpful to realize that the attainment of this ideal need not represent any great sacrificial gesture by which the attractive "rewards" of war are laid down for the lesser benefits of peace. War can be condemned not only as a moral wrong but as an economic menace to victor and victim alike. Peace is not only morally right but it is economically beneficial.

More and more, it seems clear, it is being recognized that war is just as futile as it is unjust, for futility and injustice go hand in hand. The intention of the Williamstown Institute of Politics to devote its 1929 discussion to the increasing economic competition between the nations is a timely illustration of the trend of thought, which is recognizing that modern industry and modern war are totally incompatible. The success of one rules out the success of the other.

"The dangers that lie ahead," declares Dr. Walter McClaran, secretary of the institute, "are economic rather than political. The renunciation of war as an instrument of national policy can only have that degree of importance that the industrialists and traders of the world contrive. The struggle of the commercial nations to find markets remunerative for their surplus products becomes more severe as more

and more nations become commercialized." Possibly Dr. McClaran overstates his case, but he cannot too strongly emphasize the fact that if modern industry expects to avoid the destruction of its international markets it must throw its support to the maintenance of peaceful relations, and by this act it will find that it is not only promoting the peace which is righteous, but a prosperity which is beneficial.

Recently Prof. James T. Shotwell, who contributed much to bringing about the Pact of Paris, urged the need of taking a realistic approach to the consideration of International problems. He predicted that the time would soon come when diplomacy, instead of being geared

to the army and navy, will be linked to the structure of international business. One can readily agree with Professor Shotwell, for when one comes to approach the question of war and peace, the aims of the realist and the ideals of the idealist are one. War today possesses no re-wards which cannot better be won in another way. Peace possesses no penalties, for the victory of peace is at once a victory for moral rightness and economic progress.

Uncertainty in the Far East

ARD on the heels of a report that the Japanese and Chinese had finally resolved their difficulties over the Tsinan-fu affair comes now the announcement of a new impasse. The rapidity of these succeeding settlements and deadlocks is bewildering. To forecast what may happen is only slightly more difficult than to interpret what has happened. Most striking and indisputable of all aspects of the situation is the fact that Japan, alone among the powers, has failed to come to terms with the Nanking Government.

Japan's lone-hand game in China has proved to be exceedingly costly. Not since the Tsinan-fu affair of more than a year ago has the anti-Japanese agitation in China entirely subsided. The conviction, widespread among the Chinese, that Japan sought at Tsinan-fu deliberately to stop the Nationalist advance upon Peiping, has been strengthened rather than weakened by subsequent developments. And now, with the Tanaka Government reverting to its "positive" policy, the Chinese boycott against Japan is likely to be more effectively enforced. Already, in Hankow, Japanese marines have been landed to guard property and the Japanese quarter has been given a precautionary barricade of barbed wire entanglements.

At the basis of this latest deadlock is the question of damages. It had been reported that the two nations had agreed to a standard of payment. Now, however, Japan has refused any such settlement. A counter-proposal that the damage question be waived was rejected by Dr. C. T. Wang, Chinese Foreign Minister. Japan's losses, according to Dr. Wang, were trivial, while those of China were extremely heavy-too heavy to be thus summarily dismissed.

There are many observers who believe that the questions at issue will not be cleared until the present Government of Japan is overthrown. Baron Tanaka has found a strong-hand policy congenial to his convictions and training. He has made only such concessions to settlement as were forced upon him by the exigencies of party politics in the Diet. His policies have made it equally difficult for the new Government in China and for the friends of Japan abroad.

But Tanaka's Government, just now, appears to be firmly established and firmly intent on concessions to China only where concessions are imperative. A final settlement of the problems outstanding between the two nations may not, therefore, be immediately obtained. But until such settlement is reached and guaranteed by the good will of both peoples, the international horizon of the Far East is likely to continue to be clouded with uncertainty.

The Penalty of Sedition

ECONOMIC warfare has been proclaimed by President Emilio Portes Gil of Mexico against the fomenters of sedition in his country and against those accomplices who aid in organized movements antagonistic to the present Mexican Government. He will attempt to strike an effective blow by confiscating the lands and other properties of the offenders and handing them over to peasants and workers. Pledges are offered that seizures will be made with complete rectitude, in order to avoid the possibility of fraud or satisfaction of personal enmities." It is declared that there will not be a single instance in which influence, convenience or friendship will nullify strict enforcement of seizure sentences.

The manifesto is directed against those organized clericals who are charged directly by the Chief Executive with having instigated disturbances and a seditious atmosphere, which are not the result or the sequence of recent religious prosecutions by the Government. It is pointed out that in accord with the policy of the preceding Administration, restrictive measures have been gradually diminished. The suspension of church services, decreed in 1926, was upon order of church officials themselves as a protest against Mexico's laws regulating religious activities. Hence the Government refuses to regard recent disturbances as spontaneous or disinterested demonstrations.

Evidently, President Gil regards the situation as one which cannot be met by ordinary means. Even the arrest and punishment of those acting under an undue measure of zeal when thought is inflamed by passion too often fires others to the point where all proper perspective is lost. In such an extremity it may be the wise course to penalize those organizations which can be shown to have encouraged and abetted the actual offenders by confiscating their properties and thus measurably disarming them. The remedy is heroic and drastic, but apparently the condition to be met is critical in the extreme.

President Gil finds himself face to face with a national emergency which tests his courage and his statesmanship. His fearlessness in meeting the challenge and his determination to impose the penalties which he has prescribed will combine to make less precarious than now the administrative task which he has undertaken.

Justice for Roger Williams

FTER all, the question of whether Massachusetts revokes or declines to revoke the banishment against Roger Williams pronounced 293 years ago by the Great and General Court of the colony must make little difference to anyone. Indeed, the place of Roger Williams in history as a champion of religious freedom and founder of Rhode Island is secure beyond the power of a Legislature to improve it.

Moreover, the present Massachusetts House of Representatives is not at all the same tribunal as the provincial governing body of Puritans who passed judgment upon the audacious young pastor of Salem. It is a remote successor of that assembly, its scope limited to legislative matters,

whereas the colonial court was both legislative and, in appeals, judicial. Possibly the Legislature might next be called upon to rescind the judgments in some of the witchcraft cases.

Yet, recalling certain of the beliefs for which Roger Williams was banished, one cannot help but note to what an extent later opinion has swung to his side. The complaints were that he questioned the right of the civil authority to impose faith and worship upon men in interference with conscience, and questioned the right of the King to grant lands to settlers without purchasing it from the Indians.

In view of the sympathy these opinions raise today, many may feel that the Massachusetts Legislature has missed an opportunity, that it could well afford to make the considerate gesture embodied in the resolution to annul the sentence of banishment. Such an expression of sentiment would be but small thanks for the service the exile rendered to Massachusetts when at extreme risk to himself he dissuaded the Narragansett Indians from joining in the Pequot war against the colony which had expelled him.

The friendliest relations between Massachusetts and Rhode Island undoubtedly will survive, however, and the legislative incident may serve to admonish legislators to try to apply in present-day issues the sympathy, tolerance and foresight which people suppose they would have employed had they lived in the age of Roger Williams. .

Janitor, Why Not Headmaster?

ACCORDING to a correspondent in Scotland, the question whether a schoolmaster should be a total abstainer was discussed at a recent meeting of the Dumbartonshire Education Authority recently. When the name of a candidate for the headmaster's post at one of the schools was proposed, the question was asked, Is he a total abstainer?

This simple question appeared to raise the ire of certain other members, one of whom declared that it was not customary to ask such a question. "But," retorted the questioner, "we invariably ask the question before appointing a janitor, or an attendance officer, and surely it is more important that it should be asked of one to whom we are committing the future mental and moral welfare of the children." Many people will agree that the questioner had the better of the argument.

The Amazing Mechanical Man

URING recent months the mechanical man has been increasing his repertoire. A short time ago he appeared in the rôle of a superhousekeeper. He turned on the electric stove, operated a vacuum cleaner and blew a whistle when the three-minute eggs were done. Graduating from his domestic duties, he now serves as a doorman who counts the guests as they arrive, a watchman, a traffic policeman or a fireman. In the last capacity he not only sounds the alarm but actually puts out the blaze.
On the lecture platform the robot appears

quite manlike in form. Especially is this true of Eric, the English gentleman who looks like a suit of medieval armor suddenly resurrected. Televox, who grew up and learned his tricks in the Westinghouse laboratory, will even talk, while his arms and legs respond instantly to the proper bidding.

Offstage they appear in a different guise. In ing than an ordinary radio set. Iron Mike, who steers a ship at sea with greater accuracy than any helmsman who ever stood a watch at the wheel, is disclosed as a glorified gyroscope. Thus one perceives that the business of dressing up machinery to resemble men is merely the inventors' little joke. The important thing is the constantly increasing range of the tasks which this "selective purpose" machinery is capable of accomplishing.

The man in need of a shave may scoff at the idea of intrusting his whiskers to a mechanical barber, even though he knows that the robot will not talk. But it brings an entirely different appreciation of progress in this field to see the British battleship Centurion sailing an intricate zigzag course with its band playing all the while, although there is not a single person on board. This robot of the sea is controlled by radio from vessels several miles distant.

In many cities a mechanical "hello girl" is at the beck and call of telephone subscribers. The country is rapidly becoming familiar with the dial apparatus which, with a few quick turns, selects the desired number from the thousands listed in the directory. Telephone engineers declare that the new system has practically eliminated the phrase "wrong number" from central's vocabulary.

So the robot is learning to tell ripe oranges from green ones, to put white beans in one pile and black beans in another, to operate electric substations, to watch the water-level in reservoirs, and to pilot airplanes. Eric and Televox were never intended, even by their inventors, really to replace men. But they hope to lift an increasing amount of the detail and drudgery from human tasks and thus release men for endeavors of greater scope and originality.

Editorial Notes

"Oh, what's so desolate as a tourist auto park in winter?" can never be said of the Seattle (Wash.) grounds, the city park board having ordered its employees after a recent heavy snowfall to sweep off the tables and scatter grain and meat scraps and place pans of water for the hungry wild life. The word was quickly spread and immense numbers of birds found it a wonderful parking place.

An Englishman living in Japan writes of having received public commendation and a prize of five small plates for paying his taxes. A truly charming custom! Can anyone suggest a prize that would be a fitting reward for the time spent in computing income tax?

Well, well, the House of Commons has passed the hat. That is to say, it has abrogated the rule, in the case of women, that a member rising to a point of order must wear a hat.

Beauty and Art in Florida

By WILLIS J. ABBOT

Willis J. Assor

Welvet sky, studded with stars, at the level edge of a little lake almost perfectly circular, and perhaps three-quarters of a mile in circuit. Dark green live oaks, with the sepulchral Spanish moss hanging from their branches, encircled it, with here and there a palm, or glossy-leafed magnolia, and with the soft lights of spacious homes gleaming between the trees. Where the light shone most brightly a patch of scarlet poinsettia or orange flame vine gave a flare of brilliance to the scene, and in the placid waters the perfect Doric capitals of a Christian Science church—a bit of noble architecture—on the farther shore were reflected with the white glare of the electric lights that illuminated them. We were talking of beauty, and of how needless it is to fare far afield to find it—how indeed it is to be found within the well-ordered mind without need of external and material manifestations. But even the beauty that appeals to the eye alone ought to have its place in the everyday life of other agriculture in Florida, is to find its prosperity. eye alone ought to have its place in the everyday life of man, and he is favored to whom it is furnished by surroundings little marred by the squalor found in some American towns.

Here in this mid-Florida town of Orlando—a town so

young that men still in the prime of life remember its carliest beginnings—beauty greets you on every hand. The broad streets are arched with spreading water oaks, green all winter, from the boughs of which hang festoons of dark moss, while the curbs are lined with spreading ferns the growing of which seems to enlist a considerable share of the activity of Floridians of this section. The city is built about thirty-one lakes, shallow, clear, circular in shape, so that many are referred to as "saucer lakes." Ir Orlando, and in its sister and contiguous town of Winter Park, nearly every street seems to end at a water front, and you look down the long leafy tunnels, gray above green, with splashes of flame at the sides, to the bright sparkling waters of a lakelet lying at the end.

The two cities happily situated in the very heart of Florida's orange-growing district are most fertunately complementary. Orlando, the larger, with a permanent population of 35,000 and a list of winter visitors of probably 15,000 more, is the business city; Winter Park, whose borders touch those of Orlando, is more the city of homes and of literary culture. Yet even that is a statement to be qualified, for Orlando is full of beautiful homes, ranging from the simple cottage to the mansion by the lakeside. One sees in these two places fewer of the depressing evidences of the "boom" during which "realtors" from the North swept like a plague of seventeen-year locusts through the land, leaving behind gaunt monuments to the fallacy of real-estate speculation. In Orange County, groves are still groves—they have not been planted into subdivisions with the fatuous expectation that great cities are to spring up under this genial southern sky. There may be pleasanter sights for the eye to rest upon—but I have seen none—then one of these broad and placed but I have seen none—than one of these broad and placid Florida lakes with orange groves surrounding them, the trees with their glossy foliage and golden globes of fruit, reaching in straight rows down the gently sloping banks

to the waterside. All this section is covered with groves, and one of the largest growers informs me that the acreage is constantly increasing, new groves being laid out and others coming into bearing. As with seemingly every other branch of productive industry in these days, the problem of the orange grower appears to be to make consumption keep pace with production. This year bumper crops in California and in Florida coincided, with the inevitable result of a congested market and low prices. I hear, also, general of a congested market and low prices. I hear, also, general complaint that shippers, too eager for an early market, have shipped unripe fruit North and brought disrepute on the Florida product. As one listens to the constant comparison of methods here with those in use in California, one is impressed with the thought that, however unpleasant to those concerned in it may be the competition between the citrus growers of the two states, the consuming public profits mightly. Each keeps a sharp eye on the other, each strives to excel in quality of product and in the organization of marketing systems. The consumer reaps the principal benefit.

Probably few people have any idea of the mass of detail involved in the packing and shipping of citrus fruits. We think of the fruit as plucked from the trees, arranged neatly in boxes and shipped to market. As a matter of fact, it goes through a dozen processes of sorting, washing, polishing and wrapping in great packing houses which represent heavy investments. I went to one such, about thirteen miles from Orlando, built of concrete with a lofty arched hall as large, almost, as the Boston Arena. Not a pillar obstructed the floor on which was installed ingenious machinery which sorts, washes, polishes, stamps and wraps the oranges almost without the intervention of a hand. The golden spheres are poured from the picking cases into a chute outside the building, whence on an endless traveling belt they are carried to moving planes where the sharp-eyed sorters pick out those that are unfit for market. Thereafter they move

the lipstick.

The producers who maintained this packing house specialized on the tangerine orange. One drove for hours through their groves—I have forgotten how many thousand acres they planted—but from a gentle hilltop one could see the groves extending for miles over the smiling country dotted with lakes. Around this packing house, Dr. Phillips, the owner, is building a model community for his workers, with homes, a school, church and even a notion-picture theater. It is in this form of progressive organization that the future of citrus growing, and indeed of other agriculture in Florida, is to find its prosperity. No one can drive about these interior counties, the backbone of the State, and observe the miles upon miles of orange and grapefruit groves, the widespreading fields of celery, strawberries and fresh vegetables, without feeling confidence that Florida, having turned from a vain effort to raise city lots and taken up the more economic function of raising fruits and vegetables, has a new prosperity before it. perity before it.

A banker told me that the occasional "freezes" had had their value in making people understand the necessity for a diversity of crops and a variety of interests. It was his opinion that the unhappy financial conditions caused by the "boom" were in a fair way of being corrected, at least in this central part of the State, and that the steadily increasing agricultural wealth of the State would bring a new and more enduring prosperity. It seems clear, however, that notable advances must be made in co-operative methods of harvesting, shipping and marketing the crops—especially fruit—if the real value is to be received by the grower. That is, perhaps, the only point at which your loyal Floridian will concede any superior virtue to the Californian—everyone here talks approvingly of the California fruit co-operatives. Undoubtprovingly of the California fruit co-operatives. Undoubt-

provingly of the California fruit co-operatives. Undoubtedly, however, the growing recognition of this need will soon result in its being met.

Winter Park, the seat of Rollins College, is one of the most beautiful home places imaginable. Lakes are everywhere, and their shores lined with groves and studded with attractive homes. While there are two or three show places, maintained by very wealthy families, the town is chiefly made up of people of modest means, and gives, indeed, the impression of a New England college town set down under a perpetually summer sky. It is small enough to take its tone from the college, and there is an eagerness concerning things intellectual which I have never seen in a place which in the main is a winter resort. is a winter resort.

The college, deplorable enough architecturally, is, under the stimulating presidency of Dr. Hamilton Holt, a true-center of culture. It has been the means of bringing to the town a group of young intellectuals as instructors, and of older men and women, more securely placed in literary circles, who lecture occasionally to the students and townsfolk. The Carnegie Foundation sent down this winter Count Sforza, former Italian Ambassador to Paris, and now a recognized foe of Fascism, who has been lec-turing on European conditions. Clinton Scollard and his wife, Jessie B. Rittenhouse, contribute to the circle of poets which is large and steadily growing. Indeed, there is something in the atmosphere of the place which stimulates the poetic faculty. The student magazine, the Flamingo, sets a high mark in this respect and I think Flamingo, sets a high mark in this respect and I think exceeds in quality some of the more pretentious publications of older and greater schools. A community orchestra and a Little Theater are well supported. Irving Bacheller maintains a Japanesque home here which is one of the show places of the town, and gathers about its hospitable fireplace literary notabilities from all quarters. Robert Herrick, Ray Stannard Baker, Miles Dawson, Percy Mackaye, Cale Young Rice and Alice Hergin Rice are among recent winter quests.

Hegan Rice are among recent winter guests.

One can mingle but briefly in the society of Winter Park without being impressed by its active intellectualism. The discussion of poetry is on every tongue. There are two attractive bookshops and one sees on their tables the slender pamphlets of the poets of the Winter Park School. Years and years ago the typical southern poet, Will Wallace Harney, made it his home. Perhaps the more modern singers of this lake district will forgive if quote as redolent of its atmosphere the first verse of his "South Florida Night":

The rain floats off. The crescent moon
Holds in its cup a round of dusk.
Like palm buds in the month of June
Half breaking through a vernal husk,
While breathes a low sweet undertone,
Like brooks that grieve through beds of fern,
As if, by curve and pebble stone,
The moon had spilled her silver urn.

Mirror of the World's Opinion

The Future of Australia

IT IS beyond the shadow of a doubt that the future of Australia rests as much within the keeping of the women of the Commonwealth as with the men. It may be urged that this has always been so, and in a way it has; but times have changed. The relationship between man and woman the world over is very different, indeed, from what it was in pre-war days, Prior to 1914, men and women had a mutual dependence upon each other which is hardly existent today. Particularly is this the case with the young Australian woman, married or unmarried. She demands to stand on her own-to be dependent upon her-

"Female emancipation" is the catch phrase, and, when twenty years ago, the phrase has everything to commend it. The burden of subjection laid upon our mothers, sisters, wives and daughters was no credit to man, It was

ters, wives and daughters was no credit to man. It was a crushing weight upon the advancement of humanity. It was unjust (and if there is anything on earth that a man should stand forward and denotince, it is injustice).

The old idea—man's idea—that women needed only protection and not freedom is happily gone to the discards, like many another platitude since 1914. She needs, and has a right to freedom to accomplish all of which she may be capable. Nothing is unsuitable to a woman which she has the ability to achieve, and it is up to this advanced social and political land. Australia, to remove advanced social and political land, Australia, to remove all the unfair parriers which have hitherto kept her going aimlessly round in a circle instead of marching onward, stride for stride with her men folk, to the ultimate peak

stride for stride with her men folk, to the ultimate peak of the Commonwealth's destiny.

At the same time, freedom brings with it a multitude of obligations to the citizen, and knowledge is essential to its maintenance and growth. That Australian womanhood will cement itself upon those foundations there can be no doubt, and that our young, eager and prideful Nation in the south Pacific will be the stronger, and more happily inspired for it needs no proclamation.

Aussie (Sydney).

It's New England

THE announcement that Miss Florence Trumbull and THE announcement that Miss Florence Trumbull and John Coolidge will not be married in the White House is rather autonishing. For they could be, if they wished to be, and yet they have set the time of their wedding as during the coming summer, when John's father will no longer be President. We have no doubt that Calvin Coolidge approves of this decision. They aren't much for swank and ostentation, those Coolidges. They don't seem to care about it, or, rather, they prefer to dispense with the pomp and show that would be dear to many another. That's Vermont. In Vermont, rugged soil and uncompro-

mising clime, they have dealt so long with the essential truths that nothing else really matters to them. Yes, that

would be the Vermont blood.

And yet there are the Trumbulls to consider. If the Coolidges relinquished, and quite cheerfully, the chance for a White House wedding—with columns and columns of front-page space, and with publicity in every land, it is manifest that the Trumbulls must have concurred in this relinquishment. Theirs is a Connecticut family, and the head thereof is Governor of his State. Well, that would be Connecticut also. Folks are about as practical and unpretentious in Connecticut as they are in Vermont. They are all kin of the spirit. It's New England.—Portland Oregonies. Portland Oregonian.

Young America

MERICANS do not see why services of economic con-A sequence, such as meat packing (at Chicago), hotel management, the numerous branches of engineering, and so on, should not receive the same close attention as the training of cadets; in fact, that the application of science and its methods to agriculture, commerce, and industry is worthy of time and study. Neverthéless, is English literature better served in any British university than it is at Harvard? The American outlook and the modern tendencies of American culture need today as careful an attention from the British politician as the affairs of his own Empire.—The Observer (London).

The United States Is Truly on Wheels

RECORDS compiled from the books of the various To states by Motor Magazine show that there are now 24,592,370 registered motor vehicles in this country. This is an increase of 1,463,055 over a year ago. With the beginning of the new year the number will be still larger. If we give each car a capacity of five passengers it will be seen that, combined, they are capable of carrying practically all the men, women and children in the United

Viewed from this standpoint, it is no exaggeration to say that the entire Nation is on wheels. No other country in the world compares with us in the number of motor vehicles. It is a sign of general prosperity which cannot be gainsaid. It is characteristic of the desire for speed and service that so many persons in the ordinary walks of life should contrive to have their own machines and their own garages. What might have been a luxury in a preceding generation is now regarded as a necessity by many millions in the United States. There are many other evidences of well-being to be seen on every side, but the modest car, multiplied many times, is the symbol of the high standard of living which has been attained in this country.—Philadelphis Inquirer. Viewed from this standpoint, it is no exaggeration to
